THE PATENT Exhaust Steam Injector

WORKED BY EXHAUST STEAM ONLY.

The most economical boiler feeder in existence, and at same time the simplest and most durable. Supersedes both pumps and feed-water heaters and, by condensing the exhaust steam, removes the back pressure, and, consequently, increases the power of the engine. Utilizes a power heretofore thrown away. Works automatically at a steam pressure of less than half a pound. The exhaust steam, in passing through the Injector, heats the feed-water to a temperature of 190 degrees F., thus effecting a saving over any other Injector of from 15 to 25 per cent. in fuel.

For further particulars apply to
