

THE EXHIBITION.

PRIZE LIST CONTINUED.

Happy Termination to Canada's Great Fair—Presentations to Messrs. Leclerc, Stevenson and Searle.

FOURTH DAY—TUESDAY.

After the formal opening Tuesday afternoon the grounds presented a busy aspect. By three o'clock the second series of jumping competitions took place, the grand stands being packed with spectators, who also lined the enclosure and crowded around the judges' stand in the centre of the track. The judges' stand was occupied by the members of the committee and other gentlemen, and together with several ladies, amongst whom were present during the afternoon being Mr. L. H. Masse, M. P., president of the permanent committee, Hon. Louis Beaudin, vice-president, His Worship the Mayor, Hon. J. R. Thibault, president of the citizens' committee, and Madame Thibault, Mr. Richard White, vice-president; John Crawford, chairman horse-jumping committee, Hon. W. W. Lynch, Hon. L. O. Taillon, Mr. Andrew Robertson, Hon. Peter Mitchell, Hon. J. Robertson, provincial treasurer, Mr. and Mrs. B. J. Coghlin, Ald. Hood, Mrs. and Miss Hood, Messrs. Angus Grant, S. Davis, R. D. McGibbon, D. Macmaster, G. C. M. P., D. J. Rees, R. J. Cowans, L. G. Lacombe, W. H. Arnot, Wm. Wilson, B. Tansey, Ald. Jeanotte, D. E. Bowie, J. G. H. Bergeron, M. P., Alexander McGibbon, J. G. G. J. Drummond, H. Bouthillier, Ald. Mount and others. In the absence of Capt. Campbell, Hon. Peter Mitchell acted as judge and carried out the duties of the office in an able manner. Mr. Henri Bouthillier efficiently filled the post of starter, and the general supervision of matters fell to the lot of Mr. John Crawford, the chairman of the horse jumping committee, aided by two or three members. After an exhibition of jumping by horses of the Montreal Hunt, ridden by the veteran huntsman Desjardins and others, who showed the crowd how to take a horse over the stone fence which was the cause of so much misunderstanding on the previous day, the competitors were called out for the

LIGHT WEIGHT COMPETITION
over two post and rail and stone wall for a purse of \$70, divided as follows—First \$40, second \$10, third \$10. Of those entered the following horses appeared at the post:—
Mr. Frank Elliott's Princess, 160 lbs. 1
Mr. Jas. Drummond's Harvester, 154 lbs. 2
Mr. John Nesbitt's Emma, 154 lbs. 3
Mr. B. J. Coghlin's Ivy, 154 lbs. 0
The jumping of the three prize winners was excellent and it was a close contest between Princess and Harvester. Mr. Elliott's clever performance on Princess, however, won him first place, with Harvester second, Emma third. Ivy was apparently out of sorts and refused several times.

THE HEAVY WEIGHTS
next competed for prizes to the same amount. There were five entries, but the only two contestants were:—
Mr. John Nesbitt's Emma, 154 lbs. 1
Frank Elliott's Princess, 160 lbs. 2
Mr. Coghlin's Curtis was withdrawn, but went over the jumps, his owner stating that he had subsequently decided to let him compete. The judges, however, ruled that the withdrawal was perfectly regular and that the horse was not a competitor.

THE PONY RACE,
"twice round," with one jump; prizes, \$15 and \$10.
Mr. A. McGibbon's Lady Macdonald 1
Mr. W. McGibbon's Mountain Boy, 2
Mr. W. McGibbon's Billy, 0
Mr. W. McGibbon's Duchess, 0

FIFTH DAY—WEDNESDAY.
The attendance at the grounds Wednesday afternoon and evening was very large, and much interest was manifested in the proceedings.

THE HORSE JUMPING.
The final series of horse jumping competitions came off in the afternoon in the ring. The first competition was open to horses owned by farmers and ridden by farmers' sons; let prize \$30, 2nd \$20, 3rd \$10. The following entered:—Topsy, owned by Mr. Jno. Henderson; Cutler, by Mr. J. Jeffers; Lottie, by Mr. Jas. Drummond; Mr. Jno. Smith's Pearl; Mr. Pennington's Madeleine, and Mr. Jno. Nesbitt's Emma.
The jumping was poor, except on the part of Emma, who cleared the rail and stone fence in good style. Lottie also did very well, and was given first prize on account of a protest having been entered and accepted against Emma. This protest was to the effect that she had already won prizes at jumping competitions, and this was for horses that had never won prizes. No other prizes were awarded.

The next event was a mile flat race for horses owned by farmers, in which seven

started. This was won handsomely by Topsy, Emma 2nd, and Lottie 3rd.
An amusing race was the pony race, two-thirds mile, for a special purse. Two started, Billy and Mountain Boy. The former's rider was thrown at the first round, but pluckily remounted and rode the race out. However, he could not recover the distance lost, and Mountain Boy captured the stakes easily. Mr. Wm. O'Brien was judge; Mr. John Crawford, Mr. B. J. Coghlin, Mr. Wm. Wilson, Mr. Alex McGibbon and other members of the committee acted as stewards, and Mr. George Caverhill made a very efficient starter. The fine band of the 6th Fusiliers enlivened the proceedings with their musical strains.

THE ATHLETIC SPORTS
under the auspices of the citizens' committee will take place at 2 o'clock this afternoon. The following are the entries:—
Bicycle Race—P. Guy, D. B. Holden and Wm. Farquharson.
One mile run—Thos Gallagher.
Quarter mile run (amateur)—J. Kermede, W. R. Thompson and T. Moffat.

SIXTH DAY—THURSDAY.
The Exhibition Grounds Thursday, despite occasional showers and the lowering dubious weather, presented an animated, gay appearance. Everyone was in good humor, and the street vendors smiled for favors received and looked bright in anticipation of favors to be given. The country districts were very liberally represented, as could be seen by the many attractions this year, in fact the increasing trains were crowded by representatives of the agricultural class whose joyous exclamations of "Kini/ vola! c'est vous!" ejaculated with that feigned astonishment and peculiar slang characteristic of the French race. Here was the economical person who, though on pleasure bent, yet had a frugal meal with his blouse steeped into Victor's sweat planked down his fifty cents for not quite such a *recherche* meal as was supplied to the scientists for a quarter. But here the bucolic youth had the pleasure of seeing Mr.

L. A. Senecal, "the uncrowned king of the St. Lawrence," in quiet symposium with a few friends, sipping a glass of champagne. His Majesty looks well and prosperous, and those who tried to kick him when he was down had better have taken John Billings' advice and not kick a man when down unless they are pretty sure he is not going to get up again. The Star has no text this year, and because it was not allowed to paste its own advertisements all over the premises as it did the first year of the exhibition, it did not *sulk*, like *Achilles*, in his tent, but prowled outside the canvas like the bad boy that tries to get surreptitiously into the circus. Despite its sneers and stiletto stabs the exhibition has been a most gratifying success, and it is sincerely hoped will become an annual affair for the promotion of art, industry and agriculture.

Among the exhibits which are still deserving of more than a passing glance, is a beautiful pair of ponies, owned by Mr. John Murphy, of Richmond, Que. These ponies were selected by His Excellency the Governor-General, on Tuesday afternoon, to give an exhibition in the judging ring, and were personally inspected by His Excellency, who paid flattering compliments to Mr. Murphy on being the possessor of such handsome and valuable animals. The same horses appeared again in the ring yesterday afternoon and elicited favorable comment from the large numbers of people who witnessed the exhibition. Mr. Murphy has been awarded an extra prize for his horses, and has now entered them for the Ottawa Exhibition, which opens on the 22nd inst. No doubt they will make as good a showing at the Ottawa Exhibition as they have done here.

Among the more important exhibits in the main building which we have not heretofore noticed is a diaphragm pump from the works of Messrs. T. McAvilly & Sons, St. John, N.B. This pump is remarkable for its simplicity, and is said to be the best article of its kind on exhibition. The firm have been awarded a silver medal on the pump and a diploma on brass and iron body valves for steam filters which they have also on exhibition. They have also an assortment of brass oil cups, gongs, steam whistles, &c., as well as the Barclay eight-foot cylinder lubricator, which has been greatly admired by men with a knowledge of machinery. They are likely to sell some of their pumps in Montreal, and its introduction into this neighborhood will no doubt lead to an extensive sale. Mr. A. McMurray is the agent for McAvilly & Sons.

SEWING MACHINES.
The Williams Manufacturing Co. have always taken a leading part in our Exhibition displays, but this year they have outdone all their previous efforts and have got up a display which is really creditable. They show twelve machines in all—eight New Williams' and four Williams' Singers—several of which are mounted on different styles of woodwork, full cabinet, half cabinet, etc., etc. The New Williams' is needless to remark, is a quiet movement and the ease with which it does all sorts of intricate work, including embroidery, binding, collars, working button-holes, &c., make it a great favorite with the ladies who are, of course, the best judges of such operations. The new button-hole attachment shown by this company for the first time in Canada is creating quite a sensation. Its extreme simplicity commends it to all who need an attachment of the kind. It makes a perfect button-hole of any size on any kind of goods, and seems well adapted for the purpose for which it has been invented and put on the market. We understand the Williams Manufacturing Co. have been awarded five or six first prizes for work done on their New Williams Machine in the building.

A PERFECT COOKING VESSEL.
A useful invention was shown by Mr. T. P. Tansey, who is agent for "The Safety Kettle and Steamer." The article requires to be seen to be fully appreciated and understood. The cover of the kettle is locked on by simply placing in position, and can be removed in an instant. The water is poured off through perforations in the cover, while the cooked food is retained in the kettle instead of being emptied into the sink and cesspool, as so often happens with the kettles and covers now in use. The top and side lids give perfect control in pouring water or emptying contents. The side lid will not become hot and it cannot drop down. The steamer being placed in the body of the kettle, the articles to be steamed are brought nearer to the heat, and consequently are cooked quicker and better than by the ordinary steamer.

DR. J. C. AYER, LOWELL, MASS.
through the Canadian agent, Mr. E. Underhill, makes a very fine display of Hair Vigor, Sarsaparilla and Cherry Pectoral, the whole being shown in the form of three pyramids. It is unnecessary here to say anything on these exhibits, as they have been before the public for many years, the universal verdict being that they cannot be excelled. Mr. Underhill is obliging and courteous to visitors and takes care of trouble and pains to inform the public of the curative powers of Ayer's specialties. The factory is at St. John P. Q., where a large number of people are steadily employed in preparing the above articles for the market.

AGRICULTURAL HALL.
one of the most interesting departments on the ground, is sadly destructive of romance, and one feels that the time is not far distant when editorials and even poetry may be reaped from Parnassus, bound into bundles and offered to the public of the curative powers of Ayer's specialties. The factory is at St. John P. Q., where a large number of people are steadily employed in preparing the above articles for the market.

MESSRS. FROST & WOOD,
of Smith's Falls, Ont., have a very interesting display of mowers, reapers, plows, horse rakes and twin self-binding harvesters. Mr. Frost claims for these implements that they possess simplicity, strength and durability, very necessary qualities especially in isolated districts and prairie lands, where pairing is not easily done. The reaper, which only weighs 700 pounds, is a model of lightness and strength, and is of easy draft. The twin self-binding harvester was in full operation and attracted much attention, not only from the country but from city visitors, who watched the marvellous way it gathered up the straw as if endowed with reason, tied it up in a bundle and threw it out. There is a new mechanism attached for tying knots which produces a great economy of time.

SINGER MANUFACTURING COMPANY.
A most attractive feature in the Exhibition is the tasteful and extensive display made by the Singer Manufacturing Company of New York in the Main Building. This powerful company has over six thousand offices spread over the entire civilized globe. They have five immense factories—one in Glasgow, Scotland, three in the United States and one in Montreal, Canada. They sell three-quarters of all the sewing machines sold throughout the world; their sales last year amounted to over six hundred thousand machines. This company has also a large space in Machinery

Hall, where their sewing machines upon all classes of work are running at the unparalleled speed of eighteen hundred stitches per minute. This Company is the only one of all the others exhibiting, who run their machines by steam power, and the variety and excellence of the work produced by their various styles of manufacturing and family machines on leather, cloth, corsets, skirts, etc., as well as on cloth and leather buttons, etc., have attracted immense crowds. They have machines for over twenty different classes of work on exhibition. The Company's chief office for Eastern Canada and Lower Provinces is 1675 Notre Dame street, Montreal.

L. E. N. PRATTE, NOTRE DAME STREET.
The centre space of the left annex is completely filled with the exhibit of L. E. N. Pratte of Notre Dame street, who is agent for several well known manufacturers of pianos and organs. The exhibit comprises Dominion organs and pianos at all prices from \$50 to \$1,500. In the centre pavilion of the main hall this firm also has a display of the celebrated Huzelon pianos for which they are agents, upon which recitals are given daily during the Exhibition. As there is no competition in this class no prizes have been awarded. These two exhibits of L. E. N. Pratte, however, deserve special mention.

AGRICULTURAL PRODUCTIONS.
CLASS 3—SEEDS, GRAINS, ETC.
