

2.20 ANOMALIES, DISPUTES AND COMPLICATIONS

- The formulation of the final product and activities was not disclosed.
- Safety instructions and procedures were practised properly.
- The efficiency of the reactor was discussed.

2.21 REPORT OF THE INSPECTION TEAM

During the inspection, the inspectors collected the data in note forms. However, since some samples had to be taken for off-site analysis, a time lag of four days was needed for submission of the report. Appendix 2 is the extract of the inspectors' report.

2.22 THE IMPACT OF THE INSPECTION ON THE FACILITY OPERATIONS

In the facility attachment, the inspection route and timing was planned in such a way that the inspection took place from the beginning of the batch in order to take the shortest possible time for inspection. During the inspection, the managing director accompanied the leader of the inspection team and the department managers assisted the inspectors.

OTHER MATTERS (A)

COSTS

The costs of routine inspection varies considerably from one country to another. This is mainly due to the labour, accommodation, laboratory and transportation costs. The break down of the inspection procedures carried out and their costs, are as follows:

- Initial visit preparation and initial visit, 1.5 man months;
- Pre-inspection preparation and the inspection 1.5 man months;
- Laboratory, 800,000 Rials;
- Report writing, 1.5 man months;
- Transportation: the cost of transportation depends on the location of the facility.

The costs of transportation for this exercise were around 250,000 Rials (70 Rials = \$1);

- Other expenses such as meals etc., were around 150,000 Rials.

Hence the total cost of the routine inspection was around 3 million Rials which is equivalent to about \$42,000.

For the present NTI exercise, no accommodation was needed, but under the assumption of an average 6 man is needed for the inspection to be carried out in four days, then the cost of accommodation would be around 500,000 Rials or about \$7,200.
