February 4th., 1932.

Sir Arthur Currie, G.C.M.G., K.C.B., L.L.D.,  
Principal, McGill University,  
Montreal.

Dear Sir,

The name of McGill stands deservedly high. It is hardly fair to the University to let it be dragged in the mud for lack of authoritative contradiction of the statements in the enclosed letter.

Though a graduate of McGill I am not aware of any Faculty of Mathematics and therefore cannot address this letter to such a faculty. I could address this letter to my friend Dr. Sullivan, Professor of Mathematics in the Faculty of Science but he could only answer for himself or possibly for the department of mathematics of the Science Faculty. That would not cover the possibility of some other departments of mathematics in Arts or Commerce having been concerned. Therefore I see no way of getting an authentic reply except from you.

As many people are parting with considerable sums of money on statements bolstered by the name of McGill, would you think it advisable to inquire into the matter and give us a statement that we could publish as the authentic word of the University?

Yours truly,

JOHN DOUGALL & SON
