

EXAMINATION PAPERS

ARITHMETIC;

By J. A. McLELLAN, LL.D., Inspector High Schools, and
THOS. KIRKLAND, M.A., Science Master, Normal School,
Toronto.

PRICE \$1.00.

From the GUELPH MERCURY.

. . . The work is divided into six chapters. The first is on the Unitary Method, and gives solutions showing its application to a variety of problems, in Simple and Compound Proportion; Percentage, Interest, Discount, Profit and Loss; Proportional Parts, Partnership; Chain Rule, Exchange, Alligation; Commission, Insurance, &c., Stocks, and Miscellaneous Problems. The second is on Elementary Rules, Measures and Multiples, Vulgar and Decimal Fractions. The third contains Examination Papers for entrance into High Schools and Collegiate Institutes, the fourth for candidates for third-class certificates, the fifth for candidates for the Intermediate Examination and second-class certificates, and the sixth for candidates for third-class certificates and University Honours. It will be observed that the work begins with the fundamental rules—those principles to be acquired when a pupil first enters upon the study of Arithmetic, and carries him forward till prepared for the highest class of certificates and for Honours of the University. . . . Teachers will find in it a necessary help in supplying questions to give their classes. Those who aspire to be teachers cannot have a better guide—indeed there is not so good a one—on the subject with which it is occupied.

From the ADVERTISER.

. . . By all who are groping after some method better than they have at present, this volume will be cordially welcomed, and many who have never suspected the possibility of accomplishing so much by independent methods, will be, by a perusal of the introductory chapter, impelled to think for themselves, and enabled to teach their pupils how to do so. . . . It is far superior to anything of the kind ever introduced into this country. . . . The typographical appearance of the work is of a very high character—quite equal, in fact, to anything of the kind issued by the best publishing houses of London or New York.

From the TELESCOPE.

. . . The plan of the work is excellent, the exercises being arranged progressively, each series preparing the student for the next. The problems are all original, and so constructed as to prevent the student using any purely mechanical methods of solution. . . . We should really feel proud of our Canadian Authors and publishing houses, when we consider the infancy of our country and the progress it has made and is making in educational matters, and particularly in the recently published educational works.
