It is believed there is zome truth in the report and that it means also that his excellency will be in Canada longer than was thought at first. It is regarded as doubtful if the Duke of Connaught will be the next governorment of the proposed tour.

The Street Rallway Employes' Union elected their officers for the year on Wednesday night a recount was taken. According to the first count, H. C. Johnstone was elected over R. B. BRITISH OFFICERS FACE TRIAL AS BEIHG SPIES

German Prosecutor Says Testimony Will Show That Actions Indicated Plans for Sudden Invasion.

LEIPSIC, Germany, Dec. 21.—The trial of the British officers—Captain Trench of the Royal Marines and Lieu-tenant Brandon of the Royal Navy—

Trench of the Royal Marines and Lieutenant Brandon of the Royal Navy—who are charged by the German authorities with espionage upon the fortifications at Borkum, was begun in the imperial court to-day. The officers were defended by German attorneys. The British Government was represented by its consul at Hamburg. The defendants admitted that they were gathering military information at the time of their arrest.

The evidence shows that Trench and Brandon visited Kiel, Brunnobuttel, Cuxhaven, Heligoland, Westerland, Sylt, Amrun, Fehr, Nordernoy, Borkum, Wangeroog and Bremen, everywhere making sketches, marking in maps the positions of batteries, forts and searchlights, and keeping minute records in their notebooks of military details.

The president of the court broached the question of excluding the public, but the state's attorney replied that he desired that the case should be tried publicly, only a secret session to be held when the military experts were testifying regarding Heligoland and Bremen.

The attorney added that the testi-

testifying regarding Heligoland and Bremen.

The attorney added that the testimony would show that the information gathered by the prisoners could only have significance for a power designing a sudden and unexpected attack on the German coasts.

Captain Taegert, a naval expert, said that British naval experts had formerly given the closest attention to Borkum, but since the latter was forti, fied their interest had waned and they were now studying Sylt, one of the north Frieslan Islands.

Notes in Captain Trench's memoran, dum book indicate that he was gathering material showing that Sylt was adapted for debarkation. Trench and Brandon admitted nearly all the points against them readily, but firmly refused to name the person their material was designed for.

"Do folk ever stop to speak a word of encouragement?"

"Very seldom. Most of 'em drop in their contribution as they hurry past. You'd almost think they were afraid of being seen doing deeds of charity."
