Mr. Keene would not have been very far behind his 1907 showing. The Keene horses during 1908 won 49 races, with 36 seconds and 34 thirds. John E. Madden was second on the list last year, with August Belmont third and H. P. Whitney fourth.

Mr. Keene's leading winners were the 4-year-old Ballot, the 3-year-old Maskette, Colin went wrong after winning three races or he would ho doubt have been the leading money winner of the year—an honor' he held in 1907. In regard to the information which has been laid against me for violation of the Companies' Act in connection with my advertising Apex Underwrit-ers, I have been served with an in-formation, and, while in ordinary cases I would consider it improper to make any statement in a matter that is pending before the court, yet, as the laying of the charge has been advertised, I think that from a business point of view I am justified to depart rom the usual course of silen

different position.

Firstly, because I am quite in accord with the endeavors of the provincial secretary's department and the courts of Ontario to enforce the laws governing joint stock companies, particularly the mining companies that offer for sale stock to the public, and Secondly, because of my belief that there are many people who would misunderstand, to my disadvantage, the pending proceedings, and who would not appreciate the difference between a charge which might be laid against a person for issuing false and misleading advertisement, and a charge, such as the one that has been laid against Neumann & Co., and which is simply one for not having complied with the provisions of an Ontario statute, the seriousness of which is no greater than the non-registration of a partnership that our advertising is a presentive of the property of the property and sold. The information charges that our advertising is a presentive of the property and shares in that partnership, that is, interests in the property, are being offered and sold. I understand that in some of the recent cases, preparations are being made to have the meaning of the various clauses determined by the court of appeal in order that the lawyers and the public may know exactly how far the act extends. One reading of the act would make every advertisement of any kind, the object of which was to sell mining stock a prespectus and would require stock, a prospectus, and would require some fifteen or twenty various matters to be set out in each advertisement, to be set out in each advertisement, and the law apparently also requires every company, other than the bank, or railroad, whose stock is dealt in within Ontario, whether it is an Ontario company or not, to file a prospectus. If that be the case, then almost every Canadian, whose financial abilities are such as to have caused his election to the directorate of any of

his election to the directorate of any of our leading institutions, stands to-day in danger of being fined for non-com-pliance with this act. As the determination of the will be a mere matter of law, I con-sider it not improper to let my case be the opportunity of having this state of affairs made known to the public, so that, if that be the law, arrangements may be made in accordance therewith. I certainly intend to defend my case.

As my advertising has been all of a public nature, I think that those who have put their money into Gowganda Apex Underwriters, or who contemplate doing so, should understand all the facts. Law Prevents White From Living With Indian Wife, MONTREAL, Jan. 8 .- (Special.)-

Judge Basin, in the police court, was called upon to-day to decide if a white man named Hormidas Perras, who had married an Indian woman, had the right to live with her and their children on the Caughnawaga reserve as he has been doing for some time past. The law seems quite clear in the matter and strictly forbids a white to domicile with the Indians, and in fact Perras was condemned to pay a nominal fine for the same offence in 1907 His honor took the case en delibere,
