Weston Town Council at a lively ses-sion last night, again revived the matter of the sewerage trouble in relation to the suits now pending and in the prose-cution of which the council some time ago retained the services of H. H. Dewart, K.C., and W. J. Douglas, re-tained by the petitioners. Owing to the faulty construction of the work the town is sold to have overpaid the contractors by /a large amount, and suit has been entered for recovery. It was stated at last night's meeting that Mr. Dewart had advised a settlement, the town receiving \$2600 in full of all claims, but Mayor Chariton said this amount would not pay the costs. It was finally agreed that there shoud be a conterence of all the parties interested, with a view to set. tiling up a question which has caused the Town of Weston more litigation and trouble than any other matter. Another point on which President lings designed on a standardized model. Wilson makes himself explicit is the It is not necessary to avoid beauty of freedom of the seas. obstacle to their passage? It ought to be evident to even such an unworldly statesman as Mr. Wilson, that the freedom of the seas as he describes it is the very last thing that Germany desires. Germany built the second navy in the world to challenge his ideal that in "practically all circumstances" the seas should be free and common, Great cashed anywhere in the world. of peace in the future.

Special to The Toronto World. Brantford, Ont., Jan. 22.—The death occurred here of an old and highly-re-spected resident in the person of Thomas Henry Thomas, aged 76 years. He was widely and prominently known in this city, where he had been for a great many years foreman at the Waterous Engine Works. None of the nations fighting against Germany will be prepared to cry quits and permit Germany on her word of honor (!) once more to set up her military machinery, her espionage, her will to power, until a favorable apportunity comes once more to seek the domination of the world.

Germany must make restitution and reparation even at the cost of feeling an intolerable sting and bitter memores. They could be no more bitter than those of Belgium, and it is the chief blot on President Wilson's views that he still places Belgium and Germany on the same moral level.

## Military Farewells

Radical changes must be made in the methods of sending off the troops. There have been many warnings and counselings in the past two years, but the "accident" of Sunday night makes it imperative that such another pos-sibility can never occur again. The controller was also anxious to know why some of the members had so suddenly expressed a desire to help the returned man. To him it seemed as if they wanted to make capital out of the returned soldiers and play to the gal-lery. The recommendation was to him purely a business matter. He was in favor of referring the matter back and have the city auditor try and get a returned man to fill the position. Before the controller resumed his seat Ald. MacGregor rose to ask him a ques-tion, but he ignored it with "I am not going to try and answer the foolish ques-tions the alderman asks." "That's the only kind you ca namswer," retorted Ald.
