DOUBT PERMANENCY

OF COAL SETTLEMENT

London, Nov. 4.—Commentators on the coal settlement today almost unanimously doubt its permanency in its present state. Its terms are too complicated for discussion in a cable, but it can be said that expert opinion shows nervousness because the terms do not appear to provide favorable conditions for that rapid increase in output which, the government insists, is the country's crying need. Final figures of the ballot, showing as they did an actual majority against settlement, have given cause for disquiet. The Miners' Federation, however, took the responsibility for calling off the strike, several members declaring that the men would return to work willingly. The Times sees this much good in the strike—that it has cleared the air and shown many suspicions held by both sides to be too sweeping. Nevertheless, The Times, with other newspapers, betrays a note of fear that the extremists have not been finally dealt with, altho there may be peace for some little while.
