It is true that a few who once claimed to belong to the party, have done their best, for personal reasons, to weaken it, but, on the other hand, the so-called conservative party is broken up into several hostile camps, and it may be said that there is no such party. The trouble with them is that they have too many leaders and too few followers. They have not, however, a man who has shown capacity to lead any- where but to defeat, and when these as- pring gentlemen are so presumptuous as to indicate that,the liberals of the County are ranging themselves under their banners, they ought to be anubbed. So far as the ADVANCE is concerned it proposes to stand by the liberals of the County as in the past. When an election is in sight—which isn't just yet—it will have something to say about candidates, and feels that the liberals of Northumberland will have more sense than to be hoodwinked by either straight conser- gatizes or mingwamps. Northumberland is a liberal county and, in the next House of Commons, ought to be erpresented, by a resident, independent liberal." We have italicised certain portions of the article quoted, which were intended for the class of liberals who are as easily hoodwinked and played upon, as "Liber- al" has been. We could not, how- ever, save him from following his suicidal tendencies. If he ever was a -liberal, it is evident that he has turned apostste, with as easy facility as if it were not the first time he had done so. It is better that he should do the work of his present allies in their own organ, for he is in con- genial company and honest liberals are well rid of him. There was not a line in the article, as everyone can see, to justify the assertion of "Liberal" that we said it was the party's intention to throw Mr.	spoke for the Liberal party. Nobody re- ferred to Mr. Snowball, but, with what less vulgar people than "Liberal" would consider boorish insolence, he continues his attack upon that gentleman. "There are enough of the disgusted amongst the ranks to make his defeat—if he runs—an assured fact." Then he proceeds to state it as "an open secret amongst us" [The fellows be- hind the hedge with "Liberal," no doubt] that when Mr. Snowball was elec- ted in 1878 he offered his services to the conservative leader in the province on condition that the Dominion government patronage should be placed in his hands. He also says Mr. Snowball invariably sacrificed his public duties when they conflicted with his business interests, was absent a portion of one assion. Present in his place in parliament do any framework of the services of the sufficient to disgust all owners, and the all by saying his action in the solution of the shared of the and honor." The above gratuitous as sault upon one who stands so high in the as does the object of "Liberals" who stands so high in the assons the object of "Liberals" windict tiveness, may, in that person's estimation be "fair", honest and open criticism," bu weath ak it will awaken a feeling of re	on as soon as Messis. "Dismissed" and appointments is always "friends" who seek appointment. Ex- perience, however, shows that fully fify per cent. of these friends lose their friendly interest as soon as the appointment. It seems a pointee's allegiance is at all strengthed by the favor conferred upon him. It seems a revery anall and sil'y business for either the one or the other to set up the howls over such matters that we are hearing of in certain quarters. As for dismissals, if seems wrong, in principle to make them for political reasons, but those who are most moted for political success have generally acted upon the doctrine that the victors own the spoils. The requirments of our politics organizations and the conditions of party success, therefore, demand that only those who attend strictly to their official dutie	miralty in determining the strength and composition of the addition to be made to the naval force in the North Pacific. Whatever is done by the naval adminis- tration is to be regarded, however, as merely precentionary, there being not the slightest expectation here or at London that the American government means to attack any British scaling vessel outside the territorial waters of Alaska after its repeated rejection of the overtures of the British government for a friendly and fair a 'ijudication of thg several points at issue. The fact that the government of the United States has taken no notice of the active and notorious partici- pation of its present leesees of the Pribylov Islands in the marine scaling prosecuted by British vessels and hunters from Victoria last summer, is regarded as one of many in- dications that Mr. Blaine is conducting his side of the negotiations at Washington with other views than the preservation of the fur seal and the regulation of the seal fishery. Some curiosity is felt respecting the use he intends to make of a set of instantaneous photographs, taken at the Seal Islands by officers of the revenue cutter Rush, before the arrival of the main body of the scals and while only the advanced guard of bull scals were stretched upon the 100keries awaiting the arrival of the cows, yearlings and bachelors. It would surprise nobody here to find these photographs lithographed in a Congressional Blue Bok to prove the awful destruction wrought upon Uncle Sam's seal property by those beastly Canadian poach- ers. LORD SALISBURY'S WARNING. WASHINGTON, Jan. 2, 1891. A shadow falls upon the message that the President is understood to be penning for ongress on the Behring Sea question. He has in his possession, as a part of the	"France now begins, for the first time, to understand the c.use of Bismarck's fall, and the circumstances, unknown till of late, which accompanied it. All these revela- tions are such that the ex-chancellor's bit- terest-enemies hardly venture to discuss what a shadow he cast in his descent from power over the brilliant, the iron, rule of Bismarck. "He had, of late, been an obstacle, an embarrassment and a cause of irritation to everybody, and a constant difficulty in the despatch of public affairs. "Latterly he had seen rone of the minis- ters, of whom he was the chief, had Jistened to none of their objections, and gave positive and definite orders, as if the opinions of his associates in the government were of no value. He was almost inaccessible, and re- ceived those only whom his caprice invited round him. "He tolerated no objections, listened with a condescending smile, which condemmed beforehand the ideas submitted to him by his young master, the Emperor. He even ceased, really, to work, while complaining bitterly if the slightest decision was come to without consulting him, and yet profess- ed himself overwhelmed with labor when- the even documents were sent to him to sign. "He had become a terror to all who were obliged to come near him. Nobody ventur- ed to contradict him ; even Emperor William II. saw him only occasionally, because his majcesty was afraid of disturbing or irritating him. "At last the moment came when his pupil—now his master—confronted the fact that he was not master, but only chief ser- vant. "The long restrained imperial discontent broke into open quarrel on a minor question.	<text><text><text><text><text><text><text><text><text></text></text></text></text></text></text></text></text></text>
