THE CHINESE FAMINE OVER

Washington, June 28.—After several months of extreme suffering, resulting in hundreds of thousands of deaths the Chinese famine is coming to an end. Reports from the consular officers in various sections of the affected district forwarded to the State Department by Minister Calhoun bring the news that the crops are now being harvested and there is no longer need of assistance from the United States. The American Red Cross upon receipt of this information announced that no further contributions for the Chinese relief fund are desired. The total amount received by the organization for this work was \$20,300, practically all of which has been expended. In addition to this a larger sum has been raised by religious publications through their readers, and the army transport Buford carried 1,000 bushels of rice to the American cargo of provisions and clothing contributed by commercial organizations and people throughout the country generally. It is said that had all the aid contributed by American people been available a month or three months earlier, thousands of people who perished from starvation could have been saved. In the last six months the relief funds were drawn on by the agents of the Red Cross and the American government in China for the distribution of one cent per day for each person. It was found that one cent purchased sufficient rice to maintain a life one day. The plague which has ravaged a portion of Manchuria is also reported to be almost stamped out.

The agents of the company, also took advantage of the occasion to express appreciation of his worth and presented him with a handsome silver candelabra. C. W.
