Mr. Napier read from British authorities to show that, in King William's time, Parliament had been elongated. The scheme would save money. The people are tired of elections. The return of the Governmen was not certain and the bill should pass in schemes. This bill would perfect a happy establishment. A motion was made to report progress, and also for a

three months hoist, the latter passing on a division of 21 to 18. In response to Mr. Napier's resolution asking for papers relative to the smallpox in Gloucester and Restigouche, the Provincial Secretary said they would be placed on the table as early as possible In reply to Mr. Wedderburn the Secretar stated that the Government had taken steps to circulate the regulations in reference to small-pox in other ways be sides through the Royal Gazette. In reply to Mr. Napier, he said that unless in places where the regulation had been adopted it was not compulsory that a child vaccinated should be taken back to the physician. Hon. Mr. Willis introduced, with a petition, a bill to amend the act relating to holding of the Session of the City and County of St. John; also a bill to amend the act relating to high-

ways in Lancaster, Simonds, St. Martins and St. John County. Petitions in favor of a bill to incorpor ate the Orange Association were introduced as follows: by Mr. Ryan, from J. Magee and others; by Mr. Beckwith, from Wm. Jamieson and others; by Hon. Mr. Crawford, from William McColgan and

Mr. Gaetz-"Help Yourself." Mr. Gaetz's lecture in the Institute last vening was rather a disjointed disquisition on several topics, with "help yourself" as a text. His manner is pleasing his voice clear and his delivery rapid, his attention of his large audience. The lecture taught that people should cultivate an independent spirit, an individuality of their own, and seek education, wealth, homes, for themselves, instead of depending on others, or waiting for dead men's shoes. He uttered a sharp sar gained in universities, made an indignant response to the sneers at Canada in Dil-ke's "Greater Britain," and propounded a few of the well worn protectionist plati-tudes. Mr. Gaetzclosed with a humorous allusion to the matrimonial title of Mr. Boyd's lecture, but some of the ladies were offended at being compared to the Yarmouth vessels—cheap hull and expensive rigging. The lecturer confined him-self very closely to his manuscript, only looking up to see what effect his points had on Mr. Boyd. He would first peer around one side of the lamp at Mr. Boyd, and then around the other, much to the amusement of the audience. Next time 20 Boxes Castile Soap ! MESSES. R. C. MARGESON & Co.—Gentlemen:
I have been afflicted with gravel and stone upwards of a year and a half—tried everything I could hear of for its relief, without avail; saw your advertisement of CALCULIFUGE in the Halifax papers—took three bottles according to directions, and in the short space of four weeks am entirely cured. I willingly add my testimony to its value, and heartily recommend it to all afflicted as I have been.

Ayer's Cherry Pectoral,

For Diseases of the Throat and Lungs.

A MONG the great discoveries of modern A science, few are of more real value to markind than this effectual remedy for all diseases of the Throat and Lungs. A vast trial of its virtues, throughout this and other countries, has shown that it does surely and effectually control them. The testimony of our best citizens, of all classes, establishes the fact that CHERRY PECTORAL will and does relieve and cure the afflicting disorders of the Throat and Lungs beyond any other medicine. The most dangerous affections of the Pulmonary Organs yield to its power; and cases of Consumption, cured by this preparation, are publicly known, so remarkable as hardly to be helieved, were they not proven beyond dispute. As a remedy it is adequate, on which the public may rely for full protection. By curing Coughas, the forerunners of more serious disease, it saves unnumbered lives, and an amount of suffering not to be computed. It challenges trial, and convinces the most sceptical. Every family should keep it on hand as a protection ngainst the early and unperceived attack of Pulmonary Affections, which are gasily met at first, but which become mourable, and too offen fatal, if neglected.
