Winter Comfort would brighten your home

Just try it. Just announce that you are going to install a Hecla Furnace and see how every one brightens up.

Winter in a cold house is a dreary outlook. There can never be real contentment without warmth. Why not make the old home the finest place on earth? You can transform it for a very small outlay.

No matter what price you pay, you cannot have more healthful or more economical heating than you will get through a Hecla Mellow Air Furnace.

The Hecla alone has the positive proof against impure air. Dust cannot float through the registers. Gas cannot escape into the house, for the joints are forever sealed against leakage. The Hecla Fused Joints are guaranteed not to leak.

The Hecla has wonderful provision for moisture. The air is always mellow. Dryness is found in other systems at triple the Hecla price. Consider this well. Health should guide your choice of a heating system.

HECLA Mellow Air Furnace

The coal bill is a yearly charge. Save one ton in every seven. You can do it with a Hecla, because it has a triple heating fire-pot. This is the Steel-Ribbed fire-pot used only in the Hecla Furnace. Thousands have found this a great fuel-saver. Ask them how much coal they use. That will prove Hecla economy.

Wood can be used in the Hecla as well as coal. The door is very large. Big chunks of waste wood will keep your home warm during the chilly days of spring and fall. No extra parts are needed to change the Hecla from a coal to a wood furnace.

The cost. Do you know how little it would cost to make your home comfortably warm? It is likely far less than you think. Hardly a home that cannot afford the low cost of this perfect heating \$90 to \$150 will install the finest, most healthful heating system. Investigate now.

If you will write, sending us a rough plan of your house, we will tell you exactly what it will cost to heat your home. Plans and information will be sent free.

Full information and our little booklet, "Comfort and Health," will be mailed to anyone. Mentioning The Farmer's Advocate.
