

It is common military knowledge in the Canadian army that ~~Mr. Lums~~ legs state clearly. Speed limit ~~of all rds in field up~~ ~~area 30 m.p.h.~~

A witness who was standing at some 6 meters from the road at about 60-70 km from Gezichtslaar corner has seen "a jeep" travelling at an "excessive rate of speed for the type of X rds it was about to reach. This jeep was travelling towards Bilthoven. This was at 2330 or about. The same witness saw a jeep - which in his words - could NOT be any other jeep than the one he had just seen going by. This jeep was on the right side of the road, on the corner, facing the opposite direction to Bilthoven.

No witness has stated having seen the truck hit by the jeep from the outside. Even if there had been only truck at all. The jeep met with an accident since at least four of its occupants have spent a number of months in hospital due to that particular accident.

There still was one witness from the Truck.
