## SECTION I

### General Considerations

|                                                                                                        |    |
|--------------------------------------------------------------------------------------------------------|----|
| A. PREPARATION FOR OPERATION . . . . .                                                                 | 3  |
| (a) <i>Preparation of the Patient</i> . . . . .                                                        | 3  |
| 1. In the Ward . . . . . 3                                                                             |    |
| 2. By the Medical Attendant . . . . .                                                                  | 4  |
| (b) <i>Preparation of the Operating Room</i> . . . . .                                                 | 7  |
| (c) <i>Preparation by the Assisting Staff of the Materials required</i> . . . . .                      | 7  |
| B. THE BEGINNING OF THE OPERATION . . . . .                                                            | 9  |
| (d) <i>Position of the Patient</i> . . . . .                                                           | 9  |
| (e) <i>Asepsis of the Patient and Operators—Final Cleansing</i> . . . . .                              | 11 |
| (f) <i>Anaesthesia</i> . . . . .                                                                       | 12 |
| 1. General . . . . . 12                                                                                |    |
| 2. Local . . . . . 16                                                                                  |    |
| 3. Conduction . . . . .                                                                                | 18 |
| 4. Spinal . . . . .                                                                                    | 29 |
| C. OPERATIVE TECHNIQUE . . . . .                                                                       | 30 |
| (g) <i>Direction of Skin Incisions</i> . . . . .                                                       | 30 |
| (h) <i>Division of Deep Tissues</i> . . . . .                                                          | 33 |
| (i) <i>Arrest of Hemorrhage</i> . . . . .                                                              | 33 |
| (k) <i>Closure of the Wound</i> . . . . .                                                              | 34 |
| D. AFTER-TREATMENT OF THE PATIENT . . . . .                                                            | 35 |
| E. DETAILS WITH REGARD TO ANÆSTHESIA . . . . .                                                         | 37 |
| (l) <i>Further Remarks on Local Anaesthesia</i> . . . . .                                              | 37 |
| 1. Lennander's Investigations . . . . .                                                                | 37 |
| (m) <i>Appendix to Medullary Anaesthesia</i> . . . . .                                                 | 41 |
| (n) <i>Epidural Injection into the Spinal Canal</i> . . . . .                                          | 45 |
| (o) <i>Further Details on General Anaesthesia</i> . . . . .                                            | 46 |
| F. TREATMENT OF WOUNDS . . . . .                                                                       | 63 |
| (p) <i>Sterilisation of Dressings, Instruments, and Lotions</i> . . . . .                              | 63 |
| (q) <i>Disinfection of the Skin</i> . . . . .                                                          | 65 |
| (r) <i>Prevention of Air-Infection</i> . . . . .                                                       | 72 |
| (s) <i>Implantation-Infection, and the question of Ligatures</i> . . . . .                             | 73 |
| (t) <i>The Significance of Necrotic Tissue in regard to Infection—Prevention of Necrosis</i> . . . . . | 75 |
| (u) <i>Treatment of Infected Wounds</i> . . . . .                                                      | 79 |
