MARKET REVIEW AND FORECAST

TORONTO, Oct. 14.—Weather conditions generally in Ontario have improved in the last seven days. Fall has been generally favorable, but the cessation of rains has given farmers an opportunity to get the corn in the silo. Generally speaking the plowing is about three-fourths done. A great deal of the corn has been cut and is deteriorating to some extent. The corn crop has come through somewhat surprisingly well. The wet weather increased the growth of the stalk considerably, but in most sections the leaves were killed by the early frosts, the ears continued to develop. Ontario is heavy and the general opinion is that there will be a full supply of winter wheat.

Bradstreet's Montreal weekly report states that the almost incessant rains of the last four weeks have been the cause of severe losses to farmers, more particularly in corn districts of the province. Up until Oct. 6th much cut grain and corn was still out in the fields without any chance of drying, and must have been damaged beyond repair.

The process here the allies are making on the western front, and the idea that peace is not far off, has had a decided effect on the markets. It is generally thought that there will be much uncertainty. Corn dropped off rapidly in Chicago and in sympathy, other commodities followed. Barley is firm; other feeds are weak and smaller. Lard and dressed poultry has weakened. Dairy products are stronger and further advances are expected.

WHEAT.

The Ontario Department of Agriculture reports that feed wheat looking promising, especially the early sown which has a good top. This is particularly true in southwestern Ontario. Offerings of Manitoba spring wheat were large, but the movement to Ontario points was small, as the millers had provided for their wants for the time being. Dealers are getting very little Ontario wheat, farmers delivering it to a very large extent to country millers. Fixed prices are as follows:—

Manitoba wheat—In store, Fort William, nominal (not including 3 1/2c tax), No. 1 northern, \$2.24 1/2; No. 2 northern, \$2.13 1/2; No. 3 northern, \$2.17 1/2; No. 4, \$2.14 1/2.

Ontario wheat—No. 1 winter, \$2.31, 30s 20s; Montreal No. 3, \$2.17 No. 3 spring, \$2.26.

Ontario Oats—New crop, No. 2 white, 76c to 78c; No. 2, 75c to 77c.

COARSE GRAINS.

The coarse grain market is still somewhat unsettled. Feed oats have been in a tendency to weaken the market. Corn at Chicago declined considerably and as a result there is a greater movement in the Canadian market. There has been practically no change in the price of barley, with only a limited supply being put on the market. With the selling at the country points around \$1 per bushel, it is cheaper feed than oats, which are selling 87c or more in Eastern Ontario and 75c to 78c in Western Ontario, and is decidedly cheaper than corn at from \$1.20 to \$1.30 per bushel. Quotations: Manitoba oats, in store at Fort William, C.W. No. 2, 80c; No. 3, 77c; extra, No. 1 feed, 77c; No. 1 feed, 78c; Ontario oats, new crop, No. 2 white, 76c to 77c; old crop, No. 2 white, 76c to 77c; old crop, No. 3 white, 75c; No. 3, 75c; No. 4, 85c.

MILL FEEDS.

Mill feeds met with steady demand at firm prices. The following here in cut lots per ton, at \$37.25: shorts, \$42.25.

Montral prices are quoted: Bran, \$37.25; shorts, \$42.25 per ton; mouille, \$70.

HAY AND STRAW.

The tendency of the hay market is a little upwards, due to heavy competition between Canadian and American buyers. On this market, the hay is selling at \$21 to \$22 on tracks; mixed, \$18 to \$20; straight, \$16 to \$18. The market for straw is quiet. No. 2 hay in carlots at \$24 to \$25 per ton.

POTATOES AND BEANS.

Ontario potatoes are not coming on the market in as large quantities as last year. The average yield throughout the bag more than it was a year ago. Some dealers say that the marketing of potatoes are in hope of a still higher price, shipments are now being received from the eastern provinces, pending to moderate the price here. Ontario potatoes on this market are quoted at \$2.25 per bag, wholesalers to the trade.

Beans, prime, Canadian, are quoted \$5.60 to \$7.40 per bushel; foreign hand-picked, \$5.75 to \$7. Detroit market quoted \$5.60 for extra and prompt shipment, \$5.25 per cwt.

COUNTRY HIDES.

Beef hides, green, 16c; pair cured; hide, 12c; sheep, 10c; horse, 8c; pig, 6c; No. 1, \$5.50 to \$7; No. 2, \$4.50 to \$5. Sheepskins, \$2.50 to \$5. Hides for farm stock, 30c per lb.

EGGS AND POULTRY.

The egg market is showing a slight upward. Receipts of fresh eggs are now so small that any grading factory command a premium. DAIRY PRODUCE.

Bradstreet reports that there are at present in the country 1,000,000 lbs. of Board's commanding order, 20,000,000 lbs. of creamery butter. This supply, however, is not all of the same quality and is affected by the order, will be quite sufficient to fill the demand of the Canadian market. The market is decidedly firm and prices have advanced somewhat.

There was a decided falling off in the receipts of cheese at Montreal last week. The receipts were 53,655 boxes, which showed a decrease of 7,540 boxes as compared with the previous week and a decrease of 8,866 with the corresponding week last year. The Dairy Produce Commission is paying for No. 3 cheddar, 30c; No. 2, 24c; No. 1, 24c.
