SUFFERED TERRIBLE PAINS **OF INDIGESTION.**

514

MILBURN'S LAXA-LIVER PILLS CURED HER.

Mrs. Wm. H. MacEwen, Mount Tryon, P.E.I., writes:-" For more than a year I suffered with all the terrible pains of indigestion, and my life was one of the greatest misery. It did not seem to make any difference whether I ate or not, the pains were always there, accompanied by severe bloating and belching of wind I did not even get relief at night, and nometimes hardly got a bit of sleep. In my misery I tried many remedies said to cure indigestion, but they did me not one particle of good, and I fully expected would always be afflicted in this way. At this time my brother came home on a visit and urged me to try Milburn's Laxa-Liver Pills, and got me a few vials. By the time I had taken one vial I began to improve, and could eat with some relish. I was greatly cheered, and continued taking the pills until all traces of the trouble had disappeared, and I could once more eat all kinds of food without the slightest inconvenience. I am so fully convinced of their virtue as a family medicine, I have no hesitation in recommending them."

Price, 25 cents per vial or 5 vials for \$1.00 at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Southdown Ewes A few good shearlings, and two-shear ewes in lamb to my Toronto champion ram.

Angus Cattle Buyan Angus bull to produce steers that feed easily and top the market. Robt McEwen.

STILL RUNNING.

A very small negro boy was a regular attendant at a boys' reading club, and always called for the same book, and always turned to the same place, at which looked eagerly, and then laughed he heartily.

The attendant's curiosity was aroused by a performance many times repeated, so he followed the little fellow one night, and, looking over his shoulder, saw he opened the book at a picture of a bull chasing a terrified negro across a field. He was just about to ask what the joke was, for the laugh had again come rippling up to him, when the boy looked around, grinning.

THE FARMER'S ADVOCATE.

OUESTIONS AND ANSWERS. Miscellaneous.

COLT CHEWS WOOD.

We have a colt that was raised a pet last summer. Since Christmas it is getting very thin. We feed it well on ground oats and hay. It seems to have a mania for eating wood; eating the troughs, and every wooden thing it can get at. Could this craving be stopped by some treatment? M. G. S.

Ans .- This colt may have worms. Try 4 drams each of sulphate of copper, sulphate of iron, tartar emetic, and calomel, mixed and made into 24 powders. Give a powder every night and morning, and after the last has been given, give six ounces of raw linseed oil. Feed well.

CONTINUOUS OESTRUM.

I have a Jersey cow three years old. I bred her on the 16th of February, and she has been in heat three times in ten days since. Is there anything that can be done to make her come in heat regularly ? Would you advise breeding her? D. D.

Ans .- This indicates a diseased condition of one or both ovaries. If the ovaries are diseased, practically nothing can be done. The only thing that can be done is to give her good care and breed her again, and if in reasonable time she does not conceive, dispose of her to the butchers.

WORMS IN MARE.

I have a mare that I have owned about a year now, which is coming four years old. She has never done right with me, being thin most of the time. Last summer she passed a stomach worm that I happened to notice that was about a foot long or over, and I believe she has some yet, for she is rubbing her tail quite frequently. She does not have much appetite, or, at least, does not relish her food, and has not much life for a young mare. She is doing nothing now, and she is fed a little hay, with a few ears of corn in morning, straw and carrots at noon, and a good feed of hay and the same amount of corn at night. This is all of her conditions that I can explain, and will be pleased to get a reply through "The Farmer's Advocate.' D. A. L.

Ans .-- Take 11 drams each sulphate of iron, sulphate of copper, tartar emetic, and calomel. Mix and make into twelve powders. Give a powder every night and morning. After the last one has been taken, feed nothing but bran for twelve hours. Then give a purgative of 8 drams aloes and 2 drams ginger, and feed bran only until purgation com-
