

The Call of the North

Do you know of the many advantages that New Ontario, with its millions of fertile acres, offers to the prospective settler? Do you know that these rich agricultural lands, obtainable free, and at a nominal cost, are already producing grain and vegetables second to none in the world.

For literature descriptive of this great territory, and for information as to terms, homestead regulations, settlers' rates, etc., write to

Ranked at the Very Top

DAVID Rankin was a big farmer and he knew his business. He owned the largest corn farm in the world, about 35,000 acres down in Missouri. He devoted his life to the pleasant study and practice of right farming, and he succeeded mightily, for he made \$4,000,000 in the business of farming. This is what David Rankin said about the manure spreader: "It is the most efficient money-maker on the place."

It's warm praise to be ranked above all other farm machines, but it is in keeping with what all the agricultural world has been recognizing: Soils rebel when crop after crop is taken from them, without return of fertilizer. Witness the abandoned, worn-out farms of New England. Return every bit of manure to the soil by the spreader method. The I H C manure spreader will save you much disagreeable, hard labor, will spread evenly, and will make one ton of manure go as far as two tons spread by hand.

I H C Manure Spreaders

Deering and McCormick

are built to suit you, to do best work for the buyer in every case, to convince him that he has made the wisest purchase. Every detail in the construction has a purpose for which it was made after thorough tests and experiment. They have the maximum of strength and endurance, and their construction bristles with advantages.

You will find all styles and sizes in the I H C spreader line. They will cover the ground with a light or heavy coat, as you choose, but always evenly, up hill or down. There are high and low machines, with steel frames, endless or reverse aprons, but always giving best possible service. Tractive power is assured by position of the rear wheels well under the box, carrying nearly three-fourths of the load, and by wide rimmed wheels with Z-shaped lugs.

These and many other things will interest and convince you if you look the I H C spreader line over at the local agent's. There is one for your exact needs. Read the catalogues that the agent has for you.

Will run on cheap fuels

"The Fairbanks-Morse Engines are the best we have in this part of the country. They are simple to operate and give the greatest amount of power for the least quantity of fuel."—M.F. MacLeod, Spring Hill, Que. In the construction of

Fairbanks-Morse Farm Engines

fuel economy and power efficiency are given special attention. The result is an engine that runs effectively on gasoline, kerosene or low grade distillate—maximum results at a minimum cost. The cost of engine distillate is less than one-fourth that of gasoline.

Fairbanks-Morse engines are made in any size from 1 to 200 h. p. Vertical or horizontal, portable or stationary. Equipped with Bosch magnetos and guaranteed.

The Canadian Fairbanks-Morse Co.
Limited
Montreal

6 h.p. horizontal stationary engine in the workshop will run grind-stone, lathe, drill, forge blower and other power tools.
