the mother of Theodors.

In like morner Monden, by her submiseveramentale, and good a spirit, softened the temper of a violently passion to husband, wil while she had much to suffer from him. scattered the souds of Christianity in the forth their first in him abundantly. To make their children early acquimted with the Holy Scriptures, was considered by such mothers as a task which belonged peculiarly to them - North 's Church History.

The Pin and the Needle.

A pin and a needle, being neighbours in a work-basket, and both being idle, began to quarrel, as alle falks are apt to do.

"Island Hike to know," said the pin. "what you are good for, and how you expect to get through the world without a head?" "What is the use of your head," replied the needle, rather sharply, "if you have no eye?" "What is the use of an eve," said the pin, " if there is always something in it?" "I am more active, and can go through more work than you can," said the needle. "Yes; but you will not live long.' "Why not!" "Because you always have a statch in your side," said the pin. "You're a poor, crocked creature," said the needle. "And you are so proud

General Miscellany.

Circumnavigator.

On the 15th of November, in the year 1577, been soon to lote. A per passing the Cape de Verue Islam by the rook of suring 51 days without Plate. After supplying his vessels with water from that good man, Drike so led so thwards, Baines's History of Liverpool. and promit to make the stand named after the only chance the etale to be who had preceded have the Stantest Magellan, he entered the Profes O can be the Cit of September. He arrived off Viller Lean the 2 nh of November. He plandered the town of St. Joro, where he took a boot sof 25,50 t place and very pure and fine gold. Proceeding thence to a port named Tarapaca, he landed, and found a Spaniard sleepincly the staside, with the teen lars of salver weter, hearmen met a Spillen I and an Indian boy driving eng t them, or shoop of Peru, " which are as leg as asses," every one of which had on to beek two logs of leather, each bag the llamas and their burdens to the ship, they found in all eight cwt of - lver. Thence they proceeded to Africa, where they plundered a weighing 20%. On the 13th of Pebruary they a sheat full of rials of selver, and good store of sist far beyond the limits at which vegetation above all that religious men, would set the ex- suited once a week, their health will be improved.

They at once resulting shows a vered custs of the Panama of the course of at they rapacity of this pass of a constant to make an arrange of the passents of the pass of the passents of the passent ence exerted on the telegration of her son by picked up a vessel, which contined 50lb, weight these tegions, whence his fur-seeing eye may dische mother of Theodor. "goodly great emeralds set in it" Continuing vicinnas, which, wandering in herds, frequest, and who is hourly nearing the fell sweep of its the pursuit, they at last came up with the Caca- like the chamois, the insuratain pastures adjacent fuego, which well repaid them for the trouble to the regions of perpetual snow - Humbo'at. that it had given them. Besides precious stones they found 13 chests of rials of silver, 50th. weight of gold, and 26 tons of uncoined silver young soul of her son Angustia, which, af- This rich capture was made off Cape St. Frances ter many eleracy passages of life, brought co, about 150 leagues from Panama. From thes point they proceeded to Guatulco, and thence to Ceno, where they careened their ships. On leaving the Island of Ceno, "which is in eight degrees north lattude," Drake resumed his light shed abroad upon this subject; but I am cruise, and took another rich ship; and being now satisfied with his booty, he determined to return home by the islands of the Malucos, and "thence to sail by the course of the Portugals, by the Cape of Bona Esperanca." For this purpose, he ran northward for 800 leagues, to get a favourable wind, and on the 5th day of June, "bespeedily come out of extreme heat," Drake found the air so cold that his men being pinched with the same, complained of the extremity thereof: and the further they went, the more the cold increased upon them. Whereupon they thought it best to seek land, which they found to be not mountainous, but low plain land, "We drew back again (says the historian of the voyage) without landing, till we came within 38 degrees towards the line. In which height it pleased God to send us into a faire and good bay, with a good wind to enter the same." This country was no doubt the country which has recently that you can't bend without breaking your become so famous under the name of California, back." "I'll pull your head off, if you in and this bay was probably the great bay of San suit me again." "I'd put your eye out if Francisco. The inhabitants came down to the rou touch me; remember your life bangs shore, gave Drake a very friendly reception, and by a single thread," said the pin. While the King offered him the government of the they were thus conversing, a little girl en- country. "Wherefore, in the name and to the ling the disease?" "I confess," was the reply, the fatmen's wife may gather little for unfading tered, and undertaking to sew, she very soon use of her Majesty, (Queen Elizabeth,) he took "that that is a thought that never struck me." beauty and venture; in comparison of which the broke oil the needle at the eye. Then she | the sceptre, crown, and dignity of the said countied the thrend around the neck of the pur, try in his hands, wishing that the riches and and site cottant to selv with it, she soon pul- , treasures thereof might be so conveniently transled its he id off, and threw it into the dirt by ported, to the enriching of her kingdom, as it | the side of the broken needle. "Well; aboundeth in the same." "There is no part here we no," said the needle. "We have of earth here to be taken up, wherein there is nothing to fight about now," said the pin not some special likelihood of gold or sil- sufficient to satisfy every reflective mind of its daughters that will hold the highest position in "It so ms misfortune has brought us to our ver." At his departure from the country propriety. The Liferts of Moderate Drinking. senses." "A pity we had not come to them Drake set up, as a monument of his having sooner," said the needle. "How much we been there, as also of her Mejesty's right and resemble burnin beings, who quarrel about title to the same, "a plate, nailed upon a their blessings till they lose them, and never fair great post, whereupon was engraved her they should not be habitual drickers of spicits. find out they are brothers till they lie down Majesty's (Queen Elezabeth's) name, the day that the use of these liquous is debilitating, in-tend in the dist together, as we do." - Macison and year of our arrival there; with the free of the reverse. The immediate stimulus gives a giving up of the provinces into her Majesty's temporary courage, and its effect is mistaken for hands, together with her highness's picture and an infusion of new strength. But the sticklest a piece of suspence of current English money. The substitute of the court is the court of suspence of current english money. The substitute of the court is the court of suspence of current english money. The substitute of suspence is in good repair, and under the plate was also written the name of and steady bloom, a draught of the usual grog, Drake. "It seemeth (says the historian of the or a drain, to perceive that often in a few minutes First Discovery of California by Drake, the been in this part of the courter matter and in the been in this part of the courter matter and in the been in this part of the courter matter and in the been in this part of the courter matter and in the been in this part of the courter matter and in the been in this part of the courter matter and in the been in this part of the courter matter and in the been in this part of the courter matter and in the been in this part of the courter matter and in the been in the courter matter and in t ever discover the land, by many degrees to the they attribute that to the continuouses of the southwards of this place." Such was the account fatiguing exertions. Centron Frencis Drake, sailed, from Plymouth of this land of gold, published in England, in the with five slipe, carrying 164 men and officers, reign of Queen Elizabeth. It certainly is one of professelly on a voyage to Alexandria, in Egypt, the curiosities of history that the first land ever but really with the intention of sailing into the taken possession of by the English on the con-Parally Ocean, where the English flag had never timent of America should have been the now famous California, and that it should have been occupied some years before the first attempt was ! the sight or limb, and then entered the River | made to colonise the provinces, which have since ! grown to be the United States of America .-

Universal Diffusion of Life.

When the active curios ty of man is engaged in interrogating nature, or when his imagent the old tofth part. There is tion dwells on the wide fields of organic creaters, among the multifacious impressions which his; mend receives, perhaps none is so strong and profound as that of the universal profusion with which life is everywhere distributed. Even on the polar ice the sir resounds with the cries or lying by him, of the value of 1/21 due as. He seengs or birds, and with the hum of insects. Nor took the silver, and left the exper to finish his exit only the lower dense and vaporous strata of Map. Not far from the me, going inland for the atmosphere thus filled with life, but also the higher and more etherial regions. Whenever Mount Blanc or the Cordilleras have been ascended, living creatures have been found there. On the Chimborazo, 8,000 feet Ligher than Altna, continuing 50th, weight of fine selver. Bringing | we found butterflies and other winged insects, borne by ascending currents of air to those almost unapproachable solitudes, which man, led by a restless curiosity or unappeasable thirst of vessel containing 57 wedges of silver, each knowledge, treads with adventurous but cautious steps; like him, strangers in those elevated rearrived at L ma, where they plundered all the gions, their presence shows us that their more ships in the harbour, in one of which they found | flexible organization of animal creation can sub-

Cemperance.

Taking Medicine Daily.

The responsibility of medical men is very great. I honour those who, with minds open to the fruth, have conformed their practice to the humbled to think that in a profession which depends for its success and glory on science, there should be found not a few mean enough to truckle to the vitiated tastes and prejudices of their patients. I recollect Dr. Patton, of Ameries, telling that he was visited at one time by a deputation, consisting of two ministers from this country. One of them had serious objections ing in 43 degrees towards the Pole Arctic, being to abstinence, but the other approved of it, and casion no pecuniary outlay incompatible with the returned home apparently a confirme labst timer. Some years after Dr. Pation had obersion to visit, and good management of a high grade, especially his proselyte at his own house. To the doctor's in the ten de head of the family. The mother amazement, wine was upon the table at dinner, who can clothe the children, as well as herself, and this hopeful scholar partook of it too. In a style of congelmess—always in a condition what means this, brother: did you not learn to be seen by strangers without mortification, and to abstain in my country?" The chillenged without an expenditure to embarrass her husband, backslider from the total abstin ace practice, deserves of him and of others high commendation directed the doctor to apply to his medical man. This is one of the most valuable accomplishments who was also at the table, for an explination, of the house wife; and nothing in a greater debrother has betaken him chi to wine again?" the present chapter. Where we see a family of asked the doctor. "It is sir," was the reply, children decently chal, clean, tidy, and of good-" How long have you been prescribing wine to breeding especially in the more humble walks of my friend as a medicine?" "About seven years, life, we impromptu exclaim, they must have an I think." "And has it removed the discase?" excellent mother! The country district school, you inform me," asked Dr. Patton, wis it your in the manner described, furnishes one of the usual practice to continue the same medicine for a best specimens of the healthful simplicity and the seven years, when it does not succeed in remove good dome the economy in rural locations. Here to continue a course so manifestly prejudicial to | in the ball-room are contempable and worthless health? There is no remedy so of hearings for And, indeed, what are the fashionable accom-uriling ailments, as continued cold water applied phishments of the lade of rank - her music, her physiologist, I might take my stand on this ground alone, and rear an argument for total abstinence

Tako Caro, Driakers!

The man who sails downward on the Ningara, tal s. is in danger from the ou set of his comy. aithough he may have began it where the enrent gives the least perceptible token of increased speed. So is it with the lover of strong drink .--He feels no increase of attachment, he sees no symptoms of danger. He sails along the stream of habit, until it becomes as it were a second nature, and seals his rain by refusing to be controlled .- A Word to the Work of Classes.

For Farmers.

The Farmer and his Wife.

Allusions have been made in other parts of this work to the article of clothin rappropriate in the country; but it may not be amoss to refer to it here, as one of the main to iture, of living prettily. To dress neadly at all times, and yet so as to ocor linary means in rural life, requires good taste "Then is it by your prescription, sir, that my gree, contributes to the end made the subject of "I cannot just say that it less." "Well now, will with its forty or fifty little bays and girls, attired Now, Lask, Is it right, in the face of these facts, bewels and costly attire of the fishionable lady cations. If el, then, that if I were a professional drawing, and her thippaney in French, to the ability of the tanner's wife to rear up sons that will be eminent statesmen and divines, and

While the farmer's wife is doing thus much toward living prettily, we have a few things to add for the farmer heaself to do in this good work. Who is to see that the Sunday-wagon, which takes the family to church, and now and then appears on a holiday, is free from mud and dust, and has been duly honoured with a cont of varnish? The farmer hims II, or his sone, if he have them of sufficient age. Who is to see that the courtmade white with paint? Not as farmer's wife, but the farmer himself, or some one under his direction! Who is to see that the family mansion and the various our building have been properly regarded; the bine shard betenings upon the doors all cound; the point kept bright; the No better testimony on this subject is required windows from the indicate aglast; and no loosened weather-beards to become Molley harps to the wate in the rats and mice while the family is asleep? It need not be said that this is the duty of the male t ation of the household! Let not the male sectorle d'ila til one questica more be I are considered on the edge to Lively them, whose daty is true to the edge of the mansion Adulty is here to the state of the mansion than all the mansion beautiful to the state of the presents contime a to relate a west on med an east every dee pt. 1 Sun N Con the work of the at it ad a ! House, let it be maid to the second dead finds, do respectively where here it with a fall about the minister, or the destor or course the street e cit, make on men to the second log of the confidence of to be at they will be to you, in smeetity and trath - How prettily you do live! - Eluke's Exces Day Pool for Farmers.

A Secret for a Farmer's Wife.

While the milking of your cows is going on, let your pans be placed in a kettle of boiling water. Strain the male late one of the pare taken hot valence of total abstinence would do more than from the kettle, and cover the same with another that you will have double the quantity of good rich cream, and get double the quantity of swest on and delicious butter. This was given by a farmer

----Salting Stock.
