# DE LAVAL CREAM SEPARATORS

The year that is past was one of unusual interest and importance in a Cream Separator way. Twelve months ago, we announced to cow owners the introduction of a complete new line of DE LAVAL farm and dairy sizes of machines, marking another great move forward in the development of the Cream Separator. The enthusiastic welcome given these improved machines by buyers everywhere exceeded even our great expectations and nearly carried us off our feet. Orders came so thick and fast that stock was soon exhausted and the DE LAVAL factory was forced to run day and night from March to July and continued with increased force on full time throughout the entire year. Notwithstanding the universal business depression, DE LAVAL sales for 1908 were over 50% greater than in 1907. The new machines simply swept the field of all separator honors and made the year a notable one in separator history. Practical experience in the actual sale and use of 100,000 of the new machines has but served to suggest still greater refinement of perfection and to enable us to offer, in the DE LAVAL for 1909, a machine that those who know say IS MILES AND YEARS IN THE LEAD OF EVERYTHING ELSE IN A SEPARATOR WAY. If you have not seen and used an IMPROVED DE LAVAL, you really cannot know what a Cream Separator is to-day. It's surely in your own interest to do so before thinking of buying any other. Why not write at once for catalogue and full information, to be had for the asking?
