Handsome White Swiss Embroideries

Removal Sale Prices.

THIS is a golden opportunity for you to make a selection of high-grade, white, Swiss and French Embroidery and Insertions at low prices.

Here you can select a piece suitable for any purpose, in the best the world can produce, and you'll find no trouble to match the various designs in the different widths.

Some of the richest patterns you've ever seen are amongst this excellent lot of thirty thousand yards of New Goods—they are the best we have ever shown the public and you owe it to yourself to see them before buying elsewhere.

THESE EMBROIDERIES are worked with extra fine, mercerized thread, on fabrics such as Lawn, Cambric, and Long Cloth, etc.; in pleasing, floral and geometrical designs, in the raised style—no ruff edges—similar to hand-work; in half, one, two, three, four, five, six, seven, eight, twelve, fifteen, twenty-four, twenty-seven, forty-two and fifty-four inches wide.

Just imagine, a Dress Robe made of our 54-inch wide Embroidery—nothing could be more charming.

Then think of your children—how clean and fresh they look when dressed in dainty white Embroidery frocks—so easy to make and so easily laundered. Come in and make your selection today.

Prices are extremely low for such splendid qualities.

Remember, the REMOVAL SALE PRICES continue on all our Dress Fabrics, Blouses, and all other goods that we had advertised recently.

Anderson's, Water Street, St. John's

"No man with eyes wide open can fail to appreciate the fine points of St. Lawrence Construction."

BOLINDER'S

DIRECT REVERSIBLE CRUDE OIL ENGINES.

First in 1893 Foremost in 1914

Built in sizes from 5 B.H.P. up to 320 B.H.P.

Nearly 100 vessels fitted with Bolinder's Engines for towage in the British Isles, the object of Messrs. Bolinder's design being for large Propellers at low revolutions and consequent efficiency. As an example mention might be made of the "MIRI" (160 B.H.P.) which tows regularly at Sea a 1500 Ton Tank Barge.

The Bolinder will run light indefinitely without any load whatever, and without any recourse to the Blow-lamps.

The Bolinder will run at any load down to a speed which only enables the engine to just turn over, this manoeuvring is carried out by a special device which entirely does away with the necessity for the Blow-lamps.

Bolinder Engines reverse in under 3 seconds—according to the power of the engine—and what is more reverse without a failure and without a strain on the crankshaft.
