Marl

Marl is a mixture of disintegrated limestone and clay, it contains in varying proportions lime, phosphorus and potassium. There is no better fertilizer for sandy lands than peat and marl, and it is surprising that greater use is not made of this material on many farms. Small marl beds are common over the Province of Ontario, and this material can usually be obtained for the labor of excavating. Farm labor and teams might be well employed during odd days during the summer and autumn period getting out marl for future applications. Crushed or finely divided marl can be directly applied to the land at any season of the year. —L. Stevenson.

Less Pot-washing

SMP Enameled Ware has the smooth surface and polish of fine crockery—without the breakage. And it is so very easy to clean—just like china, and therefore makes light work of pot washing.

Whenever you are buying kitchen utensils be sure they carry the **SMP** trade-mark.

Diamond Ware is a three-coated enameled steel, sky blue and white outside with a snowy white lining. Pearl Ware is a two-coated enameled steel, pearl grey outside and inside. You can't go wrong if you buy either.
