## Fifty More U.S.S.B. Ships Being Made Ready for Sea.

NEW YORK, Aug. 10 .- With the addition of thirty-fie vessels just brought out of laid up fleets the Shipping Board has about fifty steamers in various stages of preparation for active service. These are mainly intended to replace on sailing schedule ships regularly engaged in trans-Atlantic services that have been delay ed or diverted by charters for coal shipments from Euro

Fifty-six coal charters in all have been made by the Board and about seventy-five by private interests, so that, taking 7,000 tens of coal a ship as an average, the total movement currently indicated is nearly 1,000,000 ns. The Board is now ready to charter tonnage for late August and September loading, and the idicated rate is 12 shillings 6 pence. Although the demand has fallen off heavily there is still said to be plenty of inquiry in the market.

Of the fifty Shipping Board vessels referred to six are in the spot position, ready for instant allocation Nineteen are undergoing repairs and the remainder are being made ready for reconditioning. The average cost trouble s el d o m for reconditioning one of the laid up boats is \$10,000, so a total of \$350,000 is involved in the preparations for service. About 1400 men will be employed on board the vessels when they go into active operation.
