Did women smoke on account of the reason given in King James' "Countendant of the wolves have increased in California that the wolves have increased in California during the last three years since the bounty on them was withdrawn, so that there is now as many of them in that state as ever. California, Montana and Texas offered to the wolves have increased in California during the last three years since the bounty on them was withdrawn, so that there is now as many of them in that state as ever. California, Montana and Texas offered to women smoke on account of the reason given in King James' "Countendant of the wolves have increased in California during the last three years since the bounty on them was with delicate, wholesome, and clean-complexioned wife to that extremite, that the theterian countering the wolves have increased in California during the last three years since the bounty on them was with delicate, wholesome, and clean-complexioned wife to that extremite. The wolves have increased in California during the last three years since the bounty on them was with delicate, wholesome, and clean-complexioned wife to that extremite. The wolves have increased in the during the last three years since the bounty on them was with the wolves have not decreased in the during the outlay aggregating hundreds of thousands of dollars; but the results were unimportant. Iowa and Minne-

sota are the only western states which now pay more than \$3 for wolf scalps,

Meanwhile in some parts of the country wolves and coyotes are very destructive. In New Mexico they kill from \$150,000 to \$300,000 worth of sheep trans-Caucasia, on the west coast of age done to sheep is reckoned at \$100,the Caspian sea, the seat of large peproblem lies in the fact that it is impossible to secure the co-operation of the States. This lack of agreement on springs, known as the Tcherny Goro-dek. It spread rapidly and destroyed opens a wide door to fraud. Scalps opens a wide door to fraud. five refineries and a large wharf. All taken in localities where rewards are work at the adjacent fineries has been low are shipped to places where premiums are high, and thus it often hap pens that a county is compelled to perfor animals that did not belong to At the present time the bounty volves and coyotes varies from \$1.50 the latter price being paid in he Black Hills regions of South Daota. In North Dakota it is \$2; it is in Montana and Wyoming, and in

va it is \$5, except for young ani-ds. Thus rewards may be claimed profitably in Iowa for coyotes killed in North Dakota. The wolf bounty in Nevada was 50 cents when California was offering \$5 for scalps. Consequently, thousands California, and large numbers of

that California found hersel bounty law was repealed. norance of natural history or art of local authorities, heads of mestic fowls, partridges, pheasant cuckoos, butcher birds, etc., were a epted and paid for as those of hawks and owls under the "scalp act" Pennsylvania. The skins of dogs and turned in for those of wolves an the heads are sometimes accepted one county and the tails in county, so that the premiums are c lected twice. One county in Nort Dakota, waging war on ground squir

rels, first required the head, then the tail, and a year or two later all four ty system is to encourage the breeding of animals outlawed. It is said the in India many natives are regula engaged in the business of propa ing snakes for the sake of th venomous serpents. There is no this country with varied anima which bounties were granted. example, the eggs of nawks and have been taken from the nest hatched under hens. In Iowa years ago it was said to be me fitable to rear coyotes for the than to raise sheep, and Kentucky an New Mexico have recognized the possi bility of breeding wolves by requir fidavits showing that the an not been raised for the sake wards. British Columbia, by the way pays bounties for wolves, coyotes, an panthers, but requires that the skull-shall be presented to the curator o

the provincial museum for scientifi The pocket gopher is one of the worst enemies man has to encounter in the animal kingdom. It does all its work under ground, the lines of its tunnels being marked by dead and dying plants Its burrow runs a foot or so the surface, and is dug for the pur pose of getting at the roots on which it feeds. One may travel for weeks in a region infested by gophers, and yet not see one of them; they labor and
