I examined, in detail, the various steps in the manufacture of your product, such as the steam cooking, the flaking and the roasting, as well as the packing, and find all to be remarkably clean and of absolute healthfulness. The final roasting is done at a temperature above 300° F., which, with the steam cooking, completely sterilizes the product, and the entire process, from the first step to the final scaling of the package, is a mechanical one, the product at no time coming in contact with the hands or clothing of the persons handling the machines or packages.

Very respectfully,

The "Force" Food Company, Buffalo, N. Y.:
GENTLEMEN—A rumor having reached me that your product, "FORCE," contained injurious ingredients, I took the occasion to analyze it, in the interest of my own family and of some friends who are liberal users of it.

It may interest you to know that I found it consisted exclusively of Whole Wheat, Barley and Salt, and is absolutely free from any injurious elements

Permit me to express my sincere regret that such a serious and baseless rumor should gain footing

with the public.

You are free to use this letter in any way that will

help to do your product justice.
Yours truly,

To Whom It May Concern:
At the invitation of The "FORCE" Food Company, of Builalo, I have visited their Mills and made

a careful examination of the materials from which
"FORCE" is prepared, and the processes which
convert it into its finished condition.

I found that "FORCE" consists exclusively of
what my previous analysis indicated, viz.: Whole
Wheat and Barley, with a flavoring of Table Salt,
aked, cooked and sterilized by 300 degrees of heat.

exclusively, and that S. C. Smathers further declared that Hildreth merely trainer. In spite of these assertions, trainer. In spite of these assertions, the services as the service as the services as the services as the services as the service as the services as the service as the services as the services as the s lockey club just the same, in order to have the matter definitely settled. McChesney has stirred up more trouble at New York than any horse that ever Philip Paxton stalked down stairs, looked through a bridle. The fact that on Monday he was permitted to breeze a half mile at Saratoga, and that in doing so he showed absolutely no sign of "lameness," has strengthened the belief that some powerful influence was exerted to prevent the match race with Waterboy.

Just what this "influence" was nobody seems able to say, but the fact remains, they assert, that McChesney could have met Waterboy at Brighton this week. The unwillingness of Smathers and Hildreth to accept the offer for the match at Jamaica this week, and the positive statement of Trainer J. A. Joyner that Waterboy would never again be entered in such an affair disappointed the turf world ast week and is pretty good evidence, turfmen say, that somebody frowned on the match and called the participants off. No event of its kind has ever caused so much ugly talk and unpleasant relations as this fiasco. There are many wheels within wheels and many underground wires by which the affair was knocked in the head, and during the last few days.
