LLOYD GEORGE FOR U. S. PROHIBITIO

Declares Britain Should Investigate Temperance Experiment As Conducted in America.

Associated Press Desnatch. London, Oct. 19.-David Lloyd George, former prime minister, had some favorable words to say tonight of the prohibition law in the United States. He spoke on "The Responsibilities of Free Churchmen." Alluding to the church's responsibilities on the drink question, he said: "Do not let us try to cure eternal problems with an external plaster of words. Prohibition is an experiment we ought

o investigate." Despite unemployment and an adverse trade halance, he asserted that England spent last year £316,000,000 on alcoholic liquors; then, referring to the United States, he continued: "It is no use indulging in slapdash condemnation of America. Not only have Americans carried prohibition, but no political party in America dare propose abolition of prohibition. As politicians the Americans beat us at

every turn. It had been suggested that prohibi-tion in the United States was the craze of cranks, but when he went to the United States he found this entirely untrue; he never met a man who would vote for the re-establishment of the saloon. So far as public opinion was concerned, the

house was a thing of the past. In Canada, he remarked, prohibition seemed to have been less successful.

Detailing various advantages which he attributed to dryness, Mr. Lloyd George repeated: "It is an experi ment we ought to investigate. not condemn it haphazardly. not continue to make fools of themselves for long. They are the most prosperous under the sun, not be-cause they have the gold, but because they have not the drink." The former premier recalled Lin-

coln's looking forward to the time when there would be no slavery and no drink. "He got rid of slavery," exclaimed Lloyd George, "and 60 years later the people are on the high road to

accomplish the second of his ideals. Vessel Passages
