42. Stormy Petrel, one, (found injured in the Island), Nov. 4th.

Sable Island, N. S.,
       Nov. 10th, 1901.

THE GLAUCOUS GULL IN MIDDLESEX COUNTY.

During the last week in January, 1901, a large white gull was seen on the Thames river, six or eight miles west of London. After staying there for a few days it found a carcass on the farm of Mr. Elson, a few miles from Byron on which it fed for two or three days, when it was shot by Mr. Will Elson, on February 1st, who kindly let me have it, and it is now in my collection. It proved to be a female glaucous gull in the plumage of the second year, white, uniformly speckled with light gray all over. Considering that there is no definite record of the herring gull in Middlesex, it is rather surprising that this should be the first of the larger species of gulls to be obtained in the country.

                                   W. E. SAUNDERS.
