

# BLOOD INTRODUCTION

In all anaemic, consumptive and dyspeptic patients, where there is a lack of ability to produce good and sufficient blood, why not introduce it?

## BOVININE

is live blood—blood of fullness, energy and integrity, arterial blood of the healthy bullock. It is the physician's greatest auxiliary. Prepared by cold process. Antiseptic and sterilized. Try it per rectum when the stomach is unavailable. Try it per sub-cutaneous injection when collapse calls for instantaneous blood supply. Send for our scientific treatise on topical and internal administration, and reports of hundreds of clinical cases.
