

interest and value. Such, for instance, as one on functional disorders of micturition and their relations to many morbid states, the diagnostic significance of pathological modifications of the urine, urine analysis, genito urinary tuberculosis. In addition, there are complete chapters on endoscopy and cystoscopy. Among the many contributors we notice Lustgarten, who has a chapter on the Etiology of the Urethrites, Chronic Gonorrhœa, or Gleet; Stricture of the Urethra, by J. William White; Surgical Diseases of the Kidney, by Lewis A. Stimson; Diseases of the Testicle, by Dr. James Bell of Montreal; Functional Disorders of the Male Sexual Organs, by Prince A. Morrow; while the volume ends with a very interesting article on Gonorrhœa in the female, by Andrew F. Currier, of New York. The work is profusely illustrated with eight magnificent chromo-lithographs, while there are about three hundred other half-toned pictures executed in the best and most artistic manner, forming an attractive feature of the work, and serving a valuable purpose in the elucidation of the text. It would be difficult to give an adequate idea of the thoroughness of the work, it may be imagined. We may state that there are no less than ten pages in the index. Like all the publications of the Messrs. Appleton, it is a model of the book-maker's art. Any one desiring to possess the most modern and in every way the most valuable work that we have ever seen on genito-urinary diseases, should communicate at once with D. Appleton & Co., New York.

THE INTERNATIONAL MEDICAL ANNUAL and Practitioner's Index for 1893. Edited by a corps of thirty-eight department editors—European and American—specialists in their several departments. P. W. Williams, M.D., Secretary of Staff. 626 octavo pages. Illustrated. \$2.75. E. B. Treat, Publisher, 5 Cooper Union, New York.

The eleventh yearly issue of this valuable one-volume reference work is to hand; and it richly deserves and perpetuates the enviable reputation which its predecessors have made, for selection of material, accuracy of statement and great usefulness. The corps of department editors is representative in every respect. Numerous illustrations—many of which are in colors—make the "Annual" more than ever welcome to the Profession, as providing, at a reasonable outlay, the handiest and best *résumé* of Medical Progress yet offered.

Part I. comprises the New Remedies, together with an extended Review of the Therapeutic Progress of the Year.

Part II., comprising the major portion of the book, is given to the consideration of New Treatment; and is a retrospect of the year's

work, with several Original Articles by eminent authorities.

The third—and last—part is made up of miscellaneous articles, such as Recent Advances in Sanitary Science; Improvements in Pharmacy; New Inventions in Instruments and Appliances; Books of the Year, etc.

The arrangement of the work is alphabetical, and with its complete Index, makes it a reference book of rare worth.

In short, the "Annual" is what it claims to be—a recapitulation of the year's progress in medicine, serving to keep the practitioner abreast of the times with reference to the medical literature of the world. Price, the same as in previous years—\$2.75.

DIET FOR THE SICK. By Miss F. Hibbard, Principal of Nurses' Training School, Grace Hospital, Detroit, and Mrs. Emma Drant, Matron of Michigan College of Medicine Hospital, Detroit; to which has been added Complete Diet Tables for various diseases and conditions, as given by the highest authorities. Detroit, Mich., The Illustrated Medical Journal Co., Publishers. Paper, 74 pages. Price, postpaid, 25 cents; 6 for \$1.00.

This little book is a worthy supplement to any cook book, as it deals only with the dishes suitable for the sick and convalescent; the receipts being favorite ones, in use daily in the hospitals wherein the authors are employed. To this has been added the various authorized Diet Tables for use in Anæmia, Bright's Disease, Calculus, Cancer, Chlorosis, Cholera Infantum, Constipation, Consumption, Diabetes, Diarrhœa, Dyspepsia, Fevers, Gout, Nervous Affections, Obesity, Phthisis, Rheumatism, Uterine Fibroids. It also gives various nutritive enemas. The physician can use it to advantage in explaining his orders for suitable dishes for his patient, leaving the book with the nurse.

PAMPHLETS RECEIVED.
