METALS AND HARDWARE.—The advance in pig iron is well maintained, and \$21 is asked for Summerlee ex yard, there being none on the wharf. We hear of no recent transactions in American iron. The Siemens people have not yet put their furnace in blast, and are not apparently very anxious sellers. It is reported that American hoop iron is being offered at very low figures. Coke tins are not materially lower, and offers of round lots for import have been made at very low prices. There are reported transactions in round lots at figures below our inside quotation. Ingot copper has sold at 22c. per pound in moderate lots. Zinc easier at \$4.75 to \$5. OILS, PAINTS AND GLASS.—Linseed oil is subject to slight advance and likely to go higher; there is said to be a shortage of seed in Europe, and American crushers are buying in Manitoba. Turpentine is also firmer, with prospects of a rise owing to reported purchases in the South of some 60,000 bbls. for export to Europe. In some other lines there are no changes reported. We quote:—Turpentine, 44c. per gallon for single barrels; two to four barrels, 43 to 44c. Wool.—A wool salesman just returned from the West reports millmen more disposed to buy, stocks being low, and has done some fair amount of business. The London sales are progressing favorably, Germany being a pretty heavy buyer, and the firm tone is maintained. On spot sales of Cape have been made at 14 to 16½c.; with some extra lots of border wools at 16c., B.A. scoured has sold at 31 to 33c.; Australian greasy, 16c. No Nor-West here; Canadian fleece, 17½ to 19c.

TORONTO MARKETS.

TORONTO, Oct. 4th, 1894.

DRUGS.—The general features of the market are very similar to those of last week. Trade, while not dull, has no special "snap" or vigor about it. Borax is easier abroad and lower in price on the local market. Glycerine is easy, prices being considered low. Opium remains unchanged, with the market in favor of the buyers. Morphine is slightly easier. Boracic acid is easier. Mercury and mercurial preparations show tendencies of weakness. Quinine is firm; some had expected manufacturers to advance prices at the beginning of the
