

FOR NERVOUS PROSTRATION, BRAIN EXHAUSTION, and  
DEPRESSION OF SPIRITS resulting from undue  
strain upon the Mental or Physical  
Energies.

**MALTINE**

WITH

**COCA WINE**

In this Preparation are combined the nutrient and digestive properties of MALTINE with the powerful tonic and stimulant action of COCA ERYTHROXYLON. The preparation has been very largely and successfully used for relief of morbid conditions due to nervous exhaustion, and depression of spirits resulting from undue strain upon the mental or physical energies.

It will be found a valuable recuperative agent in convalescence from wasting diseases, improving the appetite and promoting digestion—and, being very palatable, is acceptable to the most sensitive stomach.

**DOSE**

FOR ADULTS.—One to two tablespoonfuls at or between meals. Children in proportion.
