

LIST OF TABLES (continued)

<u>Table Number</u>		<u>Page Number</u>
4-6	Terms Used for Description of Soil Acidity	4-18
4-7	Sensitivity to Changes in Forest Cation Nutrient Status.	4-27
4-8	Average Soil Surface Characteristics and Standard Deviations of Counties Classified as to their Potential for Nutrient Changes Related to Acid Rain. The High (Sulphate) Class has High Sulphate Absorption Capacity but is Low in Exchangeable Bases, Cations Exchange Capacity, Base Saturation, pH, Clay Content and Organic Matter.	4-34
5-1	Canadian and United States Drinking Water Guidelines for Toxic Metals ($\mu\text{g}/\text{l}$).	5-8
5-2	Effects of Ozone in Man.	5-11
7-1	Activity Categories.	7-6
7-2	Summary of Methods.	7-26
7-3	Summary of Physical Science Data Needed for Benefit Evaluation.	7-28
