Selling Was Heavy After Market Had Shown Rallying Tendency.

kotas took the snap out of buying vance, oats down 3-8c to 1/2c, and

rovisions strung out from 10c decline to a gain of a shade.

Selling of wheat was of an influential kind and developed considerable folume on all the swells. The best support was early in the day, and had thiefly as a basis unfavorable crop advices from Europe, especially France. A material reduction in the world's available supply total furnished some imporary additional help to the bull adde. Statements that in the Canadian Northwest wheat was nearly three weeks backward and suffering from frances and cold, failed to attract much notice, fine conditions on this add of the boundary proving decidedly more impressive. Primary receipts of wheat today were 475,000 bushels against 360,000 a year ago.

Notwithstanding heavier offerings from the country, corn was upheld by lowar reports of delayed planting and orobable slowness of shipments. Actual receipts here were scanty. Oats weakened in view of the more general alins.
