

large tumour appear under the jaw apply the suppurating poultice. When it is ripe open it, squeeze out the matter and re-apply a warm poultice. In a few days it will run off. Give warm bran mashes and gentle exercise.

THRUSH.

Remove the shoe and pare off all the ragged parts so as to expose the diseased parts; after cleaning the frog nicely apply a solution of blue vitriol and shortly after pour some melted tar ointment into the cleft of the frog and cover its whole surface with tow soaked in the same, and on the tow a flat piece of wood about the width of a frog, one of its ends passing under the toe of the shoe, the other extending to the back part of the frog and bound by cross pieces of wood, the ends of which are placed under the shoe. Repeat the dressing every day.

VIVES.

This is a disease most common to young horses, and consists in a long swelling of the
