local markets to-day showed clearly the effect of further realizing and prices in the main continued on the down grade, the closses were in most instances of little moment.

The reactionary movement was most pronounced in the higher priced issues, both Kerr Lake and Crown Reserve changing hands at quotations will below those current during the previous session. This had a depressing effect on the market as a whole, and induced liquidation all along the line, with naturally an easier feeling in regard to most of the speculative issues.

Crown Reserve sold as low as \$3.96. Ostal-lishing a new low record for this movement. No reason save a general disposition to realize on holdings was assigned for the decline, which was in evidence up to the close, when quotations were \$3.55.

Kerr Lake lost 35 points under forced selling, retreating to \$10, and closing weak five points lower. In view of the increased dividend declared year effort, the disbursement was being more than discounted in the open market.

FORM PROSPECTING CORPS

Australian Engineer Tenders Advice on Mining Investments.

Harold Rutledge, M.E., of Kalgoorlie, West Australia, is now in the city on his way to Porcupine, on behalf of the English Prospecting Co., for which he investigated northern Ontario's mineral regions last summer. As the result of that visit he was greatly impressed with Cobalt and the size of the camp and thinks it only needs to be better known to insure a wider share

market. Next spring Mr. Rutledge believes will see tremendous activity in the Porcupine district, and he would not be surpised to see it furnish the next gold boom and command general attention. He strongly recommends small inves-tors to pool their funds and form prospecting parties. Fortunes are made that way, and not by buying shares in five million companies. "My company," he added, "has made several fortunes, but the control made several fortunes, but the capital must be low and the management good."

Guelph Syndicate Getting Excel- Part Owner of the Hollinger Geld Claim and Others Speak of Porcupine.

A party of sixteen mining engineers and banker of Gueiph, Ontario, was in and mine owners of Cobalt who have the city yesterday carrying around just returned from a five days' survey with him a bag of gold ore got from the properties of the Munro Mines, Limited, in Munro Township, eight reports sent out of remarkable finds of miles due east of the Town of Mathe gold on several claims. They left the miles due east of the Town of Mattle son in New Ontario. This ore is in how camp on Sunday and several of blue quartz, conspicuously dotted with flakes of gold interspersed with iron pyrites, and assays from \$24 to \$7000 a ton in gold.

The Munro Mines, Limited, is a close corporation, composed of prominent where gold on several claims. They let the gold on several claims. They let the several of the party came thru to Toronto arriving on the Cobalt express yesterday morning and registering at the hotels. aspect. While the surface rock is very rich in gold, considerable development work will have to be done before it will the vein uncovered is 40 inches wide. The vein north of the shaft is 36 inches wide, and the vein south of the shaft is 30 inches wide. They have 700 sacks of ore, or 25 tons of first grade to predict that the Porcupine will be a great gold mining country. We are down about fifteen feet on our property and find the indications as favorable as appear on the

surface."
Questioned regarding his plans, Mr. Timmins said that if the government would improve the road leading into the country, considerable machinery would be freighted in this winter by his and other concerns. Twenty-five men under a capable road-builder, he said, would be able to put the road between Keiso (mile post 222) and Porcu-pine Lake into first class condition within 25 days. The present road was chopped thru at the expense of the O'Brien and Timmins people, but it is too narrow for a freight road. If easy matter, Mr. Carter says, for his company to make a shipment and get returns from the ore within thirty logs off, they would have a first-class winter road.

Mr. Timmins has thirty-five men employed on development work and is now considering the matter of taking in machinery necessary to the carry-ing on of more extensive operations. He expects to return to the north with-in a few days.

Another of the party who came out since Sunday is B. B. Leyson, mining engineer of Cobalt. To The World Mr. Leyson says that almost five townships have been staked out in claims and hundreds of prospectors are extending the staked zone weekly. He had been over only a small section of the coun-try, but had seen some excellent show-ings. Undoubtedly a number of the OUEBEC CABINET CHANGES
