

We Have The Names of 1,800,000 People Who Are Users of Liquozone

All of these people asked us to buy the first bottle—a 50c. bottle—and give it to them free. We did it—and we will do it for you.

There are millions of other users of whom we don't know. We learn only of those who write us. But each user tells others about it, and those others tell others. Ask your friends if they use it, and you will be surprised at the number who do.

Your own neighborhood is full of Liquozone users. Ask a few what they think of it—ask them what it does. If they say it is wonderful—that it does all we claim—then let us buy you a 50c. bottle. Try it at our expense; see what it does for you. If you find it effective and needful, tell others about it, as we have told you.

Not Medicine. Liquozone is not a medicine. It is not made by compounding drugs; nor is there any alcohol in it. It is made solely from gas—largely oxygen gas—by a process requiring immense apparatus and 14 days' time.

This product has, for more than 20 years, been the constant subject of scientific and chemical research. The object of its discoverers was to get the virtues of oxygen in stable form into the blood. Their reason was that oxygen alone can kill disease germs without harm to the living tissues.

Each cubic inch of Liquozone requires the use of 1,250 cubic inches of the gas. And that is all that goes into it—the gas, and the liquid used to absorb it. The result—after 14 days—is a germicide so certain that we publish on every bottle an offer of \$1,000 for a disease germ that it cannot kill.

Acts Like Oxygen. The virtue of Liquozone lies in the fact that it does what oxygen does. Oxygen is the vital part of air, the very source of vitality, the most essential element of life. Oxygen is also Nature's greatest tonic, the blood food, the nerve food, the scavenger of the blood. It is oxygen that turns the blue blood to red in the lungs. It is oxygen that eliminates the waste tissue and builds up the new. You could not live three minutes without it. And half the sickness in the world is caused by having too little.

Liquozone acts like oxygen. It gives to every nerve center just the food that it needs. It gives new power to every function of nature. It brings back vitality at once. No other known product can compare with it as a vitalizer. And Liquozone is the only tonic that never leads to reaction.

Kills All Germs. Another fact is that an excess of oxygen destroys any disease germ. The reason is that germs are vegetables; and an excess of oxygen—the very life of an animal—is dead to vegetable matter.

So with Liquozone, but the vital difference is this: Oxygen is a gas, and an excess of it cannot be maintained in the blood. Liquozone is a liquid, concentrated, stable and powerful. It goes wherever the blood goes; and, as no germ can escape it, and none can resist it, the results are inevitable.

To the human body Liquozone is the most helpful thing in the world. But anything vegetable instantly perishes wherever Liquozone goes. The fact that germs are vegetables has enabled the discoverers of Liquozone to solve the great problem of killing germs in the body without killing the tissues, too. And there is no other way. Any drug that kills germs is a poison, and it cannot be taken internally. In that fact lies the great value of Liquozone.

It is the only product known—the only product man can conceive of—that can destroy the cause of a germ trouble without harm to the living tissues.

We Paid \$100,000 For the American rights of Liquozone, and the British Lighth Ozone Co. paid the same sum for the rights in Great Britain. This is the highest price ever paid for similar rights on any scientific discovery.

We tell you this fact because it best indicates the value of Liquozone. Claims are easily made, but men of our class don't pay a price like that save for a product of very great worth to humanity.

Before making this purchase, we tested Liquozone for two years through physicians and hospitals in this country and others. We tried it in all kinds of difficult cases obtainable. We saw it cure hundreds of sick ones with whom everything else failed. And we saw many a patient brought back from the verge of the grave by it.

We proved, to the satisfaction of the best physicians, that in germ troubles Liquozone did what nothing else could accomplish. We proved it to be of more value to sick humanity than all the drugs in the world combined. Then we staked our fortunes and our reputations on it.

Every member of this Company uses Liquozone daily in his family to prevent sickness, and millions are learning to do likewise. Liquozone is now employed by hospitals everywhere, and by the physicians of nearly every nation.

Each of those 1,800,000 people suffered from a germ disease. Ask some of them if Liquozone cured them—if it destroyed the germs. Ask if they advise you to take Liquozone, then do as they say. Half the people you meet know someone whom Liquozone has cured.

Millions of people use Liquozone constantly. Yet we have never asked a person to buy it. We have asked them only to let us buy the first bottle—just as we ask you. They have continued its use because of what Liquozone did for them—just as you would. Won't you—for your own sake—be one of those millions? Won't you write for a bottle today?

Drugs are doubtful and slow. Medicine is not proper treatment for any form of germ attack. Liquozone goes directly to the cause of these troubles. It attacks the germs, wherever they exist. A germ disease must end when the germs are killed; nothing is more certain than that. Then Liquozone, acting as a tonic, quickly repairs the damage done, and restores a condition of perfect health. Diseases which have resisted medicine for years yield at once to Liquozone, and it cures diseases which medicine never cures. In any stage of any disease in this list, the results are so certain that we will gladly send to any patient who asks it an absolute guarantee.

One Full-Size If you need Liquozone, and have never tried it, we ask you to send us the coupon below. We will then send you an order on a local druggist for a bottle, and will pay the druggist ourselves for it.

We have already done this with 1,800,000 people, and it has cost us over 100 million dollars to announce and fulfill the offer. Don't you realize that a product must have wonderful merit when we spend \$1,000,000 just to let a sick try it?

That is our only method of making Liquozone known. We publish no testimonials; we tell you of none if we have cured; we use no physician's endorsement. We prefer to ask you to try it, at our expense. Then judge for yourself what it does.

If you have already used Liquozone, this offer, of course, does not apply to you. But if you have not used it—if confident. If so they will find Kings county giving nine conservatives and one liberal; Queens county three conservatives and two liberals, and Prince county four conservatives and six liberals; total conservatives, 16; liberals, 14.

Looking at the matter from every standpoint a very close contest may be expected. Neither party will have a landslide, and a hard fought campaign may be looked for. Neither party can muster a majority of over four in the new legislature.

The candidates for Charlottetown are Dr. McNeill and P. S. Brown for the conservatives and Dr. Warburton and Geo. E. Hughes for the liberals.

"RIGHT STEP." NEW DIVORCE CANON IS SO REGARDED. NEW YORK, Nov. 13.—Marriage and Divorce was discussed this afternoon at a "mass meeting" in St. Agnes' chapel in West 92nd street. Rev. Dr. Morgan Dix presided.

Dr. Manning, vicar of St. Agnes' chapel, said the meeting was not considered as a protest against the action of the recent general convention of the church in Boston, when the canon on divorce was so amended as to make remarriage by a clergyman of the church more difficult. He said the new canon, while not all that he and many of his brother clergymen had wanted, was nevertheless a step in the right direction.

It is the strongest action this church has ever taken," he said, "and we hope soon to see the church go further and declare against the remarriage of any man or woman who has either wife or husband living."

Rev. Dr. David H. Greer, bishop coadjutor of the diocese of New York, in an address said: "This widespread divorce evil is the wasting sickness in our national life, calling for immediate and heroic treatment. It is the growing and spreading cancer spot in the nation's body, whose only remedy is the knife. You may not temporize with it; it must be cut out by the roots."

Dr. Greer said the only remedy will be for the church to insist that once entered upon, the marriage relation may be dissolved for one cause only—that is, the ideal we most hold before the American people," he continued, "and strongly and persistently insist upon. This may not cure this evil, but it will do much toward that end. This is the ideal and it is to an ideal that the human heart ever leaps. When it comes to moral matters there is nothing to which men so quickly respond as a great and high ideal."

Francis A. Lewis of Philadelphia, who was one of the delegates in the general convention who fought against any recognition of divorced persons by the church, said that in the years 1869 to 1901 there had been 69 divorces in the Dominion of Canada and in the United States 700,000.

That meant, he said, that the homes of not less than 1,400,000 persons had been desolated in this country and that as many children had been robbed of their rights to a real home.

REV. J. DeWOLFE GOWIE

Has Received a Call to Hampton Church.

More Lights Wanted at the Station—Probate Court in Session Yesterday.

HAMPTON, Kings Co., Nov. 16.—Everything seems particularly dull here at present except the weather, which, apart from Monday's storm, has been exceptionally fine and pleasant. A little snow has fallen, but not sufficient to make sleighing or to materially affect the good roads for wheeeling. Today, however, the sky is overcast and fine flocks of snow are constantly falling, the ordinary performer of a heavy fall.

All around there are regrets at the short supply of cordwood for the winter's use, and many families have to be content, at present, to use soft wood, slabs and mill edgings, in place of the more desirable and satisfactory rock maple and beech, which have heretofore been the regular fuel supply of the people. Coal stoves are also being more generally brought into use, and indications point to the early extinction of wood fires for ordinary heating and cooking purposes.

The introduction of the new and improved acetylene gas plants is also likely to make other methods of lighting fall into disuse. The Victoria Acetylene Gas Plant Company, which started to manufacture here a few months ago, is now working under way, and have installed the system in two of the largest stores—those of T. C. Donald, druggist, and R. H. Smith, general merchant and postmaster.

Main street, along the station square, is thus made bright and attractive during the hours of evening these stores remain open. On the other side, at the corner of Railway avenue and the Village road, the store of A. W. Barnes is also brilliantly lighted by an acetylene gas plant of another company. Between these two bright and pleasant centres lie the railway station premises, which are illuminated by two small common oil lamps placed in dingy lanterns on the north-western front of the building, which do not sufficiently light up the platform to prevent people walking over its edge and falling on the track below. These two lamps, apart from the signal lights, are the only outside lights which our economical government thus far has provided for the safety of the public at this important railway centre. The people are now hoping that the enterprise of the merchants named, and others who are going to install the new acetylene gas plant in their stores and residences, will encourage the railway authorities to do something to "lighten our darknesses," and the more because Hampton gave a majority of twenty-nine votes at the recent election in favor of the government candidate.

This is one matter in which the gentleman who claims to be the channel through which government patronage is to flow can serve the public interests, please his supporters and opponents alike, but "with a slight twist in the neck towards Biddy," and gain general commendation all at once. Let us have light.

Last evening the parishioners of the English church held a meeting to elect a successor to the Rev. C. D. Schofield, rector, who closes his connection with the Hampton church next Sunday, to take the rectoryship of one of the Sydney, C. B., churches on the first Sunday in Advent. G. O. D. Otty was in the chair and Geo. Langstroth, secretary, presided, within an hour the election, and it was unanimously decided to extend a call to the Rev. J. R. DeWolf Cowie of St. Mary's, York county, to be their next rector, notification of which was sent to him by telegraph with the request for a speedy answer. A resolution, offered by Dr. F. H. Wetmore, and carried with hearty unanimity, expressed regret at the sunsetting of the ties which so closely united the retiring rector to his parishioners, appreciation of the valuable services he had so freely and faithfully given to every department of church work, and the cordial wishes for the health, happiness and success of himself and Mrs. Schofield in their new field of labor.

The Rev. Mr. Schofield made a brief but feeling reply, in which he thanked the vestry and members for their close and constant co-operation and support at all times during his ministry and reciprocated their kind expressions and wishes on behalf of himself and Mrs. Schofield. The meeting was then adjourned for two weeks to await the reply of the rector elect.

It is understood that Mrs. Schofield will spend a few weeks with her family and friends at St. John before joining her husband at Sydney. Thanksgiving Day being a legal dies non, the regular session of the probate court of Kings Co. was brought on this afternoon, Judge Geo. G. Gilbert presiding. Thomas Norton of Cardwell, harness maker, and Albert Byron Pugsley of Sussex, hotel keeper, executors named in the will of the late Enoch Morton, widow of the late Elkanah Morton of Cardwell, farmer, petitioned to prove the will and to receive letters testamentary thereunder. The will was proved by Melbourne Scott, one of the witnesses to the signature, and letters testamentary were issued as prayed for, the value of the estate being \$4,000, all personal property. The number I heirs is very large. H. H. Parles, proctor. Ora P. King submitted his bill of costs as proctor in the matter of the estate of the late Rufus Hicks, and also the bill of costs of the Hon. A. S. P. King. The bill of costs of the estate of the late Robert J. Nesbitt, which were duly taxed.

Men's Long Boots HAND MADE. WHOLESALE & RETAIL.

Made of whole stock, long legs, heavy bottom. Every pair made in our own shop. \$3.00 per pair. NOTE THE PRICE. M. SINCLAIR, 45 Brussels Street, St. John 1115

ONE CENT BRINGS A catalogue of FREDERICK BUSINESS COLLEGE, has been the means of leading many a young man and woman to secure an education which is now returning to them in salary.

HUNDREDS of Dollars. Sold for free catalogue. Address W. J. OSBORNE, Fredericton, N. B.

DR. J. COLLIS BROWNE'S CHLORODYNE. THE ILLUSTRATED LONDON NEWS, of Sept. 26, 1886, says: "If I were asked which single medicine I should prefer to take should my life be likely to be most generally useful to the exclusion of all others, I should say CHLORODYNE. I never travel without it, and its general applicability to the relief of a large number of single ailments forms its best recommendation."

DR. J. COLLIS BROWNE'S CHLORODYNE IS THE GREAT SPECIFIC FOR Diarrhoea, Dysentery, Cholera. CAUTION—Genuine Chlorodyne. Every bottle of this well known remedy for DIARRHOEA, COLDS, ASTHMA, BRONCHITIS, CHOLERA, etc., bears on the Government Stamp the name of the inventor—DR. J. COLLIS BROWNE.

DR. J. T. DAVENPORT, Limited LONDON. Wholesale Agents: Lyman Bros. & Co., Ltd., Toronto.

DR. McGAHEY'S Heave Cure. Hampton, druggist, petitioned for and received letters of administration on an estate valued at \$1,550 personally. All the other heirs renounced in petitioner's favor. The bondsmen are Elias McDiarmid of St. John, druggist, and Allan W. Hicks, Hampton, gentleman. E. R. Chapman, proctor.

PARIS, Nov. 16.—The stability of the entire cabinet is considered to be seriously threatened by the resignation yesterday of the war minister, General Andre. Reports circulate that Marine Minister Pelléan, Foreign Minister Delcassé and other ministers are about to resign, but those who are close to these ministers say these reports are unfounded. However, the cabinet as a whole is not likely to survive long. A new cabinet may be formed within three weeks. It is considered certain that Foreign Minister Delcassé will remain in the re-organized cabinet.

From Punta Arenas, Nov. 16, Mr. Albuera, Grady, for Baltimore via Montevideo. ALL FOR 10c. DR. JENNER'S INHALER, and prove that it will radically CURE CATARRH AND CATARRHAZ DEAFNESS. By oily vapor inhalation, we have arranged with the undersigned druggist to supply all catarrh sufferers, within the next ten days, with DR. JENNER'S INHALER, together with two bottles of medicine.

FOR ONLY TEN CENTS. We do this to make known the wonderful merits of this noble remedy. You inhale (see illustration), clouds of healing carbolated balsam vapor into every air passage of the nose, throat and bronchial tubes, healing the membrane and radically, pleasantly and permanently curing chronic catarrh. For remedy on above liberal terms, call at McDIARMID & CO., 47 KING ST., ST. JOHN. Those who cannot conveniently call at the drug store, can have DR. JENNER'S INHALER, together with two bottles of medicine, mailed to their address, by forwarding only Ten Cents (silver) to ANGLo-AMERICAN CHEMICAL CORPORATION, 32 Church St., Toronto, Ont.

FORMER ST. JOHN MAN A SUICIDE IN NEW YORK.

Captain A. T. Rouse, R. N. R., Son of Late George Rouse, Drank Carbohic Acid—Relatives Reside Here.

The following telegram was received late last evening: NEW YORK, Nov. 15.—Capt. A. T. Rouse, Royal Navy Reserve of Great Britain, suicided by drinking carbohic acid at his lodgings, West Sixteenth street, in his room were found letters signed "Your loving sister Annie," dated Carleton, N. B., and also envelopes marked, "Return to 19 King street, West St. John, N. B."

The sister Annie referred to above is Mrs. Dr. Hazelwood of Carleton. Capt. Alphonso Troop Rouse, R. N. R., was a son of the late Geo. T. Rouse, formerly a barrister in this city. At the early age of 14 Alphonso Rouse went to sea, and at 22 became captain of the vessel John E. Gladstone, owned by the late Judge Palmer of this city. This vessel was lost in a storm in mid-ocean.

Capt. Rouse afterwards commanded the vessels Frederica and John E. Bayre. The latter vessel was wrecked off the southern coast of Nova Scotia. After this vessel was lost Capt. Rouse returned to his native town. Capt. Rouse afterwards commanded the vessels Frederica and John E. Bayre. The latter vessel was wrecked off the southern coast of Nova Scotia. After this vessel was lost Capt. Rouse returned to his native town.

SMITH'S BUCHU LITHIA PILLS A POSITIVE CURE FOR RHEUMATISM AND ALL AFFECTIONS OF THE BLADDER AND URINARY ORGANS. AT ALL DEALERS—25 CENTS. A CURE AT THE PEOPLES PRICE.

left the sea for a time. He lived for two years on Princess street, St. John. During this time his wife died. Shortly after her death he went to England and settled at Edgerley. While there he married again, his second wife being the daughter of Dr. Glover of that town. Capt. Rouse then purchased a beautiful summer home in North Street.

He had accumulated a considerable fortune before going to England and for a time lived a retired life. Being a thorough sailor, however, his mind naturally was on the sea a good part of the time, and having plenty of leisure time and being a man of extraordinary genius, he resolved to do something for the benefit of navigation. The result of his labors was the invention of a new anchor, which has been successful on vessels where it has been used in allaying the turbulence of the waves in time of storm.

Mrs. Hazelwood has been in correspondence with her brother constantly since he left St. John. Up till about eight days ago, when she received her last letter she had been hearing from him twice a week. It seemed that living in New York did not agree with him, although he did not complain in his letters of not being well. In fact, he had always been a very hearty man. Since coming to New York, however, he had fallen away in weight from 220 lbs. to 175. Capt. Rouse recently made a trip to Buenos Ayres in command of a large English steamer. He returned to New York in March last.

Capt. Rouse has three brothers living, all sea captains of some fame. Capt. Fred Rouse was a lieutenant in the U. S. navy and commanded a vessel in the Cuban war, doing excellent service. There were ten in all in the family.

Capt. Rouse leaves one daughter by his first wife, who is now Mrs. Dunlop, and lives in Ottawa. Mrs. Hazelwood was much shocked when she received the news last evening of her brother's death. She knows no reason why he should have committed the deed. She has not seen him since he left home over ten years ago, but heard from him regularly. She had been looking for a letter from him for two or three days, and wondered what he did not write. The deceased was about 50 years of age.

Battle line steamer Albuera, Capt. Grady, sailed from Punta Arenas, Chili, Nov. 16, for Baltimore via Montevideo.

P. E. ISLAND ELECTIONS.

The Contest Promises to be a Close One, And the Conservatives Have Very Fair Chances of Winning.

CHARLOTTETOWN, Nov. 14.—Again the political bugle has sounded and each party is marshalling its forces. The campaign will be a short one, only until December 7th. Nearly all the candidates are in the field, thus rendering it possible to survey the situation somewhat correctly. Both sides have a large degree of confidence. The conservatives take the dominant vote, and from it make their forecasts.

Dividing the province into counties we have now in Kings county nine out of the ten local seats held by conservatives. Premier Peters is the only liberal member from Kings county. To expect a more favorable result in the next election would be a rather sanguine prediction for any party.

In Queens county the dominant vote in the different local ridings gave a conservative majority of nearly two hundred in three districts and a small liberal majority in two districts. In Prince county only one district out of the five gave a liberal majority, the conservative majority in the other ridings ranging from 92 to 143. Thus it is figured out that the conservatives have the standing of the local houses after the next election should be: Conservatives, 23; liberals, 7.

But there are other factors to be taken into account. In the local campaign some of the conservative candidates are admittedly weak. And there is the prestige of a liberal government in power at Ottawa, carrying with it the desire of many to be on the winning side. And as the local is an open vote the liberal strength will be materially increased thereby. There are those also who honestly think that it would be detrimental to the best interests of our province to elect a government not in harmony with the federal government. And there are a host of office holders with their pockets full of money, who are denying the fact that the public at large are losing faith in the liberal administration of this province. Their record is one of financial disaster, it has been a series of alarming deficits. It has withal been an era of cumbersome taxation. When the liberals assumed the reins of power fifteen years ago the province was practically free from debt. The interest payable at that time was less than \$700. But that interest has steadily increased until in 1892 it was \$26,068.91, and in 1902 \$30,185.43. This is a sorry tribute to a financial record. As it is it requires every dollar of our land tax to pay the interest on the provincial debt, which now exceeds \$700,000. In other respects, too, the liberal administration has been a failure. But with all its faults there are those who love it still. The conservatives must not be over-

Psychine Strengthened My Whole System

Pure Blood in your veins now will save you much in purse and person before the winter is over. PSYCHINE makes rich red blood, keeps people well and at their best.

"Today I am enjoying good health, solely through the use of Psychine. When I began using Psychine, I was suffering with a heavy cold in the bronchial tubes, and a cough which seemed to rack me to pieces. The doctor's medicine gave me no relief, and I began to dread consumption, working on me. With the second dose, Psychine benefited me and gave new strength. Psychine toned up my whole system, and quickly stopped the cough. I heartily recommend Psychine to persons run-down, in need of a tonic, or suffering with coughs, colds or catarrh. I bless the day I tried Psychine."—Allen Connor, Frinjer, near Picton, Ont.

PSYCHINE is pronounced SILKEEN. For sale by all Druggists at \$1 and \$2. For further advice and information write Dr. Bloom, Limited, 119 King Street West, Toronto, Can. SOLD BY ALL DRUGGISTS AT \$1 and \$2.
