Almost every patent medicine, advertised to cure boils, I could get hold of, I tried, but still without success. At last one day, last spring, someone happened to say; "why not try taking Survice Blood Sitters for the blood?" I was willing to try anything and immediately sent for a bottle, but at the time was doubtful if it would be of any use. However, I used that bottle and while I was taking it I began to feel better, aithough I still kept having a few boils but not nearly such bad ones. Iddd not miss any work, while otherwise, I used to miss, sometimes, a week ont of every mouth. I kept on taking the medicine until I had taken six bottles, and needless to say, I was nessory I did so when I tell you I have not had a boil appear for the past three months. Every body was surprised when they heard that Burdook Blood Bittershad done for me what four decrease failed to do. If any sufferers are affloted with boils, I would strongly advise them to use B.B.B. It makes you feel like a new man. I always keep a bottle in the house, now, as I think it is a medicine that should be in every household.

Prospects Are Good For the Next Season's Hunting—Can Feed

AUGUSTA, Me., Jan. 29.-Reports received by the Hon. L. T. Carleton of Winthrop, chairman of the commission on inland fisheries and game, show that not in the history of most of the hunters and woodmen now actively engaged in the pursuit of their occupations has there been a year when the deer, moose and other game in Maine have had such a fine time and such high living as during the past winter months. In past years the public has read these reports with interest, and

FREIGHTER'S BOW STOVE IN BY FLOAT

Tide Sweeps the Calderon and Load ed Raifroad Craft Together Off Governor's Island, N. Y.

NEW YORK, Jan. 29.-With a crash that was heard a mile away the Cal-deron, a freight steamship, on her way sea, bound for Manchester, and loat of the New Haven railroad, lader with fourteen freight cars, came to-gether off Governor's Island opposite the Battery yesterday morning.

The Calderon stove a large hole just aft of her port bow and close to the water line and was obliged to put back to the Erie Basin for repairs. The float was run upon the flats off Governor's Island, where it heeled over and now lies almost submerged. The cars fell from the float and went to the bottom. Miscalculation of the strength of the tide racing between the Battery and Governor's Island was responsible for the accident. Warped out from pier No. 8, in Brooklyn, with the assistance of the tug Dalzell, soon after six o'clock, the Calderon took in her hawers and headed for the bay. When off the Battery tug No. 9 of the New Haven railroad was seen approaching with a car float on either side and bound from Jersey City to the Harlem River. Each float contained fourteen cars full of shingles. Captain Russell of the
