

Book Probe Harrison And Wright Off To UK

The President of Students' Council says he may have to ask the council to launch an investigation into the operations of the University of Alberta bookstore.

Dave Jenkins says he has received a number of complaints from students and professor alleging poor service. For example, it is reported that the majority of the 15 professors in the history department refuse to deal through the bookstore and use a downtown bookshop instead.

President Jenkins says he would be interested in learning of all complaints, "if there are any." These should be sent or taken to his office in the Students' Union Building on or before the council meeting at 7 p.m. Tuesday, Feb. 5. He says notes should be signed, but that he will withhold a name if the sender so indicates. Such notes should be sealed in an envelope marked "personal."

Going for two years of post-graduate study in Engineering in the United Kingdom are W. C. Harrison and J. D. Wright, eng 4, as recipients of the Athlone Fellowship Award for the University of Alberta. The United Kingdom Board of Trade will pay their full expenses.

They are among 42 winners of the award in Canada. The awards stress academic standing but also take into account interest in student affairs.

Harrison is a native of Medicine Hat and while in Air Cadets there, was winner of an exchange tour to the United Kingdom. In engineering physics, during his first two years of university he placed first in the Faculty of Engineering.

He received the British America Paint Company Scholarship in Engineering in 1960, while in 1961 he

received the Gas Companies Undergraduate Scholarship in Engineering. In 1962, he received a University of Alberta Honor Prize.

Harrison hopes to study in the field of nuclear engineering and heat transfer at the University of Manchester.

WALTER C. HARRISON

WRIGHT BRIGHT

From Trochu, Alberta, Wright was active in Students' Union affairs in high school. In chemical engineering, he placed first in his third year in the Faculty of Engineering.

In 1960, he received a University of Alberta First Class Standing Prize. In both 1961 and 1962, he received a University of Alberta Honor Prize. In 1962 he received the Chemical Institute of Canada Prize in Chemical Engineering, the John Wilcox Memorial Prize and the California Standard Company Scholarship.

Although Wright has not yet decided what university he will attend in England following his studies, he plans to study for a Ph.D.

JOE WRIGHT

Fire One... Fire Two... Got Him

One man was nearly hit in the eye by a shot gun blast of rice during a recent interfraternity skirmish.

What ended in gunfire started earlier in the day as a snowball fight, originated by members of the Delta Upsilon fraternity.

The fight moved from one fraternity house to another, growing in numerical strength. After a short battle with the Delta Kappa Epsilon fraternity, the various groups returned to their respective houses, and a short-lived quiet prevailed.

Later in the day, a car, full of Dekes, passed the DU house, firing a quantity of rice or salt at several men, who were standing on the lawn. Several were hit, one very close to his eye, and, with this, the battle, which is becoming somewhat of an annual affair, came to a close for another year.

Here are statements from two fraternity members:
 "... guns from both sides of the car—a typical Al Capone type of attack."
 "... the Dekes were curbing juvenile delinquency by keeping the kids off the streets. The attack was something new and novel on campus—lots of rice, and away we go!" (This obviously from a DKE spokesman.)

GARNEAU UNITED CHURCH

THE UNITED CHURCH BY THE UNIVERSITY CAMPUS
 11150 - 84th Avenue
 (5 blocks south of the Tuck Shop)
 Minister: REV. BLAKE PRITCHARD

11:00 a.m.—MORNING WORSHIP
 7:30 p.m.—SERVICE FOR STUDENTS AND NURSES.
 COFFEE-TIME AND Y.P.U.

We invite you to make Garneau United your Church Home

...on
 becoming a
Management Science Representative
 at **IBM***

A Management Science Representative is an engineer or scientist who analyzes operating systems in business and industry to supply management with information that will assure sound decisions.

The Management Scientist may formulate mathematical models, using techniques like linear programming, dynamic programming, queuing models and simulation. He may be required to analyze an entire operation or any part of it, such as the operation of a refinery complex, the control of production and inventories, the planning and scheduling of large-scale projects, to name but a few.

Management Science is a new and challenging field where a graduate in Statistics, Physical Sciences, Mathematics or Engineering can learn fast and develop rapidly.

For information about becoming an IBM Management Science Representative, write to the executive whose name appears below.
