MOLINE UNIVERSAL TRACTOR

It Solves The Farm Help Problem

With the Moline-Universal—the original two-wheel tractor—*One Man* can farm more land than was ever before possible, because—

One Man has power at his command equal to six horses, capable of doing the work of nine horses, due to its greater speed and endurance.

One Man operates the Moline-Universal from the seat of the implement to which it is attached, where he must sit in order to do good work.

One Man can start in the spring and go from one operation to another—plowing, harrowing, planting, cultivating, sowing, harvesting grain or corn, spreading manure, filling the silo, cutting wood, etc., doing all farm work from one year's end to another, independently of horses or hired help.

All these one-man operations are possible with the Moline-Universal because it is mounted on two wheels. It attaches direct to the implement, making one compact unit—the tractor the front wheels and the imple-

ment the rear wheels. *One man* controls the entire outfit from the seat of the implement.

Being close coupled to the implement, the Moline-Universal Tractor backs as readily as it goes forward, and turns in a 16-foot circle. It steers so easily that a boy or woman can handle it as well as a man.

The light weight of the Moline-Universal Tractor, 3,380 pounds, and its high clearance—greater than that of the average cultivator—make it perfectly adapted for cultivating. It is not the kind of tractor that does your plowing and seed-bed preparation, and then rests while your horses do the planting, cultivating and harvesting.

Mechanically, the Moline-Universal is the most modern tractor built, containing more refinements and improvements than any other tractor on the market. High speed, efficient motor. Electric lighting and starting. No necessity to keep the engine running idle.
