

Everything is in the Roll

Rex Flintkote is easily laid by an ordinary workman, and everything needed to lay it comes in the roll. This is one of the things that make Rex Flintkote the standard by which all other roofings are now measured.

REX FLINTKOTE ROOFING

is much higher in quality and a little higher in price than the "next best." Those who cheerfully pay the price are first absolutely convinced of the quality. Let us convince you.

SEND FOR FREE SAMPLES AND BOOK

The book will tell you all about REX Flintkote Roofing, and the samples will show what it really is and enable you to test its properties. "Look for the Boy."

Dispersion Sale

OF HILLOREST HERD OF

BERKSHIRES

TO BE HELD ON

Wednesday, June 19, '07

AT VINE, ONTARIO,

Comprising the whole herd, without any reservation. The stock boars are Concord Triumph 13303 and Stall Pitts Winner (imp.) 12185. The brood sows number half a dozen or more, either bred or with pigs at their side; also some pigs of various ages.

The farm is close to Vine Station, G.T.R., a few miles south of Barrie. Catalogues issued. At the same time the whole outfit will be disposed off.

JOHN LAHMER, Vine P. O., Ontario.

Send to us for a **CAT** - alogue, "FREE,"

containing particulars of the farms we are selling on a

School Land Basis.

Improved lands with good buildings, close to markets, elevators, schools and churches, are not often offered on such terms as these.

When you are through seeding we would like to show you over the land, then you will be convinced that we have the right thing.

GOSSIP.

A correspondent having written to the Scottish Farmer that he believed a mistake was made by the man who reported the case of a ewe having lambed twins on the 7th of April and a single lamb on the 13th of same month, another shepherd writes that he knew a case, that came under his own observation, in which a ewe dropped a second lamb thirteen days after she had given birth to a single lamb, both of which lived and did well, the first lamb being put on another ewe when the second came, and the latter nursed by the mother.

The well-printed and illustrated pamphlet recently issued by the Canadian Ayrshire Breeders' Association, containing the minutes of the annual and directors' meetings of the Association for 1906-7, should be secured by every farmer interested in the breed. It contains, besides the minutes of meetings, the scale of points for judging Ayrshires, and the rules and regulations for the Record of Performance, and is liberally illustrated with portraits of notable prizewinners at principal Canadian shows. Parties desiring copies should write the secretary, Mr. W. F. Stephen, Huntingdon, Que.

AGRICULTURAL EDUCATION IN GERMANY.

Among the distinguished delegates to the semi-centenary of the Michigan Agricultural College were Dr. Steinbruck, of the University of Halle, Germany, and Nikola Kaumanns, whose business card describes him as the "Imperial German agricultural attache to the United States," with headquarters in the First National Bank Building, Chicago. To a representative of the press, who interviewed him, Prof. Kaumanns said:

"While Germany really is a pioneer in agricultural science, her advance in that line is not to be compared with that of America. There are several reasons for this. One is that our farmers—and our people generally—are more conservative, and they hesitate before accepting new ideas.

"Another reason is found in the fact that the German Government has not been generous in the distribution of funds for the purpose of advancing agriculture on a scientific basis. This is where the American agricultural colleges and experiment stations have a great advantage over similar institutions in Germany. They are provided with funds for the distribution of free literature among the farmers, and receive plenty of money to carry on the work. In this regard Germany has been handicapped; yet we have made great progress, and the outlook for the future is very encouraging. We have an agricultural college in every state, and they, with the experiment stations, are doing a grand work."

QUESTIONS AND ANSWERS. Veterinary.

JOINT ILL.

Colt, ten days old, took joint ill. My veterinarian treated it. It broke and discharged matter. The swelling has disappeared, but it is still lame, and the opening still discharging.

Ans.—Recoveries from cases of this kind are very rare, and it would have been better if you had left the case in the hands of your veterinarian. Flush out cavity with a four-per-cent. solution of carbolic acid in water, three times daily, and give 5 grains iodide of potassium in a little of the dam's milk as a drench, three times daily.

BURSAL ENLARGEMENT.

Colt, two weeks old, has soft swellings below the knees on the outsides.

G. B. N.

Ans.—These are bursal enlargements that, in all probability, will disappear spontaneously. Leave them alone, and, if still present in the fall after weaning, blister them.

HEIFER PASSES BLOOD.

Cattle were driven 25 miles in two days. One heifer passes blood, and she has not done well, and does not eat well. She is now on clover pasture.

S. S.

Ans.—Give her 2 drams each of gentian, nux vomica, powdered opium and solid extract of belladonna in a quart of warm water as a drench, three times daily. If there is any tendency to constipation, give one pint raw linseed oil, once daily as indicated.

Lump Jaw

The first remedy to cure Lump Jaw was

Fleming's Lump Jaw Cure

and it remains today the standard treatment, with years of success back of it, known to be a cure and guaranteed to cure. Don't experiment with substitutes or imitations. Use it, no matter how old or bad the case or what else you may have tried—your money back if Fleming's Lump Jaw Cure ever fails. Our fair plan of selling, together with exhaustive information on Lump Jaw and its treatment, is given in Fleming's Vest-Pocket Veterinary Adviser.

Most complete veterinary book ever printed to be given away. Durable bound, indexed and illustrated. Write us for a free copy.

FLEMING BROS., Chemists,
75 Church Street, Toronto, Ontario.
