TRADE TOPICS.

GOOD NEWS FOR THE WOMEN.—We are always glad when, by any means, we can lighten the labor of the ladies. An old saying has it, "That a woman's work is never done," and it has been nearly true, for when other tasks have been accomplished, between times, and at the end of the day, all times, the darning basket, with its endless pile of gaping stockings and socks, has taken all the leisure hours. But the Chipman-Holton Knitting Co. have come to the rescue, and in this week's advertisement offer Holeproof Hosiery for the entire family, backed by their reliable guarantee. The use of their hosiery will add much to the comfort of all, the leisure of the women, and will save dollars, as well as discomfort and work. Every reader will do well to turn to this advertisement, and, having studied it and his old hose, to follow this sign-post to greater comfort.

STEEL ROOFING.—Our fathers scarcely ever thought of any material for roofing except shingles, and the possibility of the supply of shingle timber running out and necessitating the use of other kinds of roofing did not occur to many people until a comparatively few years ago. Galvanized iron certainly has been successfully used for special styles of roofs in cities for many years, but the idea that it, or rather galvanized steel, would ever have come to be a common and favorite material for roofing barns in Canada would have seemed to the past generation too preposterous to be entertained. Look at the cost, they would have said. But with the price of shingles mounting higher and higher, a change has come, until barns roofed with steel are now to be found in every section of Ontario. The fact that a steel roof, whether of steel shingles or in the form of corrugated sheets, is practically lightning proof, has had much to do with the favor with which they are regarded. If there be metallic connection between the roof and the earth, no better lightning protector could be erected. If the sides, as well as the roof of the building, were sheathed with metal, the protection from lightning would be absolute. Another advantage of the steel roof is that it is fireproof. No spark can kindle a flame on it, and, in some circumstances, that would mean a great deal. The manufacturers of this class of roofing claim that, in addition to the above advantages, it has the merit of being durable. Fifty years is given as the time that such a roof, properly put on, will last. Assuming that the latter claim is correct, there is a strong combination of good qualities in the steel roof, in being lightning proof, fireproof, and durable, as well as waterproof. There are several Canadian firms manufacturing steel roofing in the form of shingles and sheets, and doing an immense business.

GOSSIP.

NEW PERCHERON FIRM.

The Percheron-horse importing firm of Hamilton & Hawthorne, at Simcoe, Norfolk County, Ont., has been dissolved, and in future, as indicated in their advertisement, the business will be carried on by Robert Hamilton & Son, whose intention is to go more extensively into the business than heretofore. They will leave June 22nd for France, for the selection and importation of some forty head of high-class stallions and mares, which, if all goes well, will be shown at Toronto and London this fall. Messrs. Hamilton & Son have a first-class reputation as dealers of horses and reliable business men, and the Percheron is steadily gaining in popularity as a farm and draft horse where best known.

GENTLE GRANDMOTHER

"I guess I'll go back to the country," said the gentle grandmother.
"What's the trouble?" inquired her son.
"About you treating me right?"
"Yes, but the baseball season is here, and I can't be able to resist the temptation to go to the games."
"Well, I'm easy."
"If you're seen in the crowd, and somebody's excited, I'll be almost sure to get somebody's excuse for going to the office."

Proper Lubrication

For Steam Traction Engines and Steam Plants

Capitol Cylinder Oil

Delivers more power, and makes the engine run better and longer with less wear and tear, because its friction-reducing properties are exactly

fitted to the requirements of steam traction engines and steam plants.

Traction Engines, Wagons, Etc.

Plows, Harrows, Drills

Gasolene and Kerosene Engines

Mica Axle Grease

makes the wheel as nearly frictionless as possible and reduces the wear on axle and box. It ends axle troubles, saves energy in the horse, and when used on axles of traction engines economizes fuel and power.

Granite Harvester Oil

insures better work from the new machine and lengthens the life of the old. Wherever bearings are loose or boxes worn it takes up the play and acts like a cushion. Changes of weather do not affect it.

Standard Gas Engine Oil

is the only oil you need. It provides perfect lubrication under high temperatures without appreciable carbon deposits on rings or cylinders, and is equally good for the external bearings.

Every dealer everywhere. If not at yours, write for descriptive circulars to

The Imperial Oil Company, Limited
Ontario Agents: The Queen City Oil Co., Ltd.

"BT" STANDS FOR Best

"BT" Hay Carriers are giving satisfaction in every Province in Canada. No load is too heavy for them to handle.

Fig. 100 shows the "BT" Maple Leaf Car. It is a strongly-built Malleable Carrier weighing thirty-five pounds (about ten pounds more than other makes). It has a tread of 14 inches on the track (four inches more than others). The wheels that the rope runs over are 3 1/2 inches (larger than in any other). It has a large open mouth that allows the bail pulley to enter from any angle, and no matter how the rope may twist. It has many other features of merit that we would like to tell you about. We also have Special Sling Carriers.

The "BT" Line of Hay Tools includes The Provan Line of Oshawa, The Whitman & Barnes Line of St. Catharines, and the Tolton Line of Guelph. No other line is as broad. It will pay you to get our Catalogue.

BEATTY BROS., FERGUS, ONTARIO.
We also build Stanchions and Steel Stalls and the "BT" Litter Carrier.

Fig. 100—Maple Leaf Car.
