

SURETY BOND INSIDE EACH ROLL OF CONGO ROOFING

With the 3-ply Congo Roofing sold hereafter there will accompany each roll a Guarantee Bond, issued by the National Surety Company, insuring to the purchaser a good roof for ten years at least. The bond covers that space of time—but we are very confident that with the ordinary care and attention called for Congo will last much longer.

Congo is so thoroughly durable, reliable and altogether satisfactory that we have no hesitancy in offering our customers this security.

Congo has achieved for itself a reputation as the "never-leak" roof, which it sustains through all the vicissitudes of weathers and climates.

This bond is issued as a proof of our belief in Congo and the National Surety Company stands back of it and back of every roll of Congo made. We know its worth and usefulness and want everyone who has a building to roof over to know the satisfaction of a Congo Roof.

To-day is the time to write for a sample and full information regarding this special offer.

tion, earth makes a fairly satisfactory floor, and costs nothing to lay.

2. On a well-rammed foundation of concrete, mixed 1 part of good Portland cement to 8 or 10 parts clean gravel (with some small cobblestones worked in, if available), lay a finishing coat which should be mixed about 1 part cement to 3 of fine gravel or coarse sand, if the cement is not to be covered with plank, but if it is to be overlaid, the finishing coat might be made thinner, and mixed about 1 to 4, floating off smoothly.

3. Plank is better, but on the whole, we prefer plank laid on a cement foundation.

OX HAS FRACTURED BONES—SOWING RAPE

1. I have an ox which had a hard knock about two inches below the eye. This happened about a year ago. A swelling appeared after about two months, gradually getting larger. It came to a head, broke, discharging matter. I washed clean with warm water and carbolic. Since then the swelling has come to a head in three different places, and has broken, discharging matter as at first. The swelling is still there, and is very painful when touched. The ox is in good shape otherwise. Can I do anything to take the swelling down and stop the matter from collecting?

2. I want to sow an acre of rape and an acre of sugar beets with a three-horse Massey-Harris drill, how shall I fix the drill so as to sow evenly? L. A. S.

Ans.—1. There is a fracture of the bones at the place where the injury was inflicted. It is the dead and detached pieces of bone that is causing the discharge and swelling. The only chance of a cure is in cutting into the part and taking out all diseased and loose pieces of bone, and thoroughly flushing out the cavity once or twice a day with an antiseptic solution, such as carbolic or creolin, a tablespoonful to a quart of clean water.

2. Stop up the holes in the drill so as to make the rows about 30 to 36 inches apart, with the drill open about as far as for peas at the rate of three bushels to the acre, you should get the beet seed on about thick enough. Notice how thick it lays in the ground: there should be a continuous row of seed not more than two inches apart. For the rape, you would probably get the seed on more evenly to sow by hand. Make ridges on the surface of the land about twenty inches apart, then dribble the seed into these by hand. A funnel, made of brown paper, will save bending over, and the acre can be sown in less than a day. About two pounds of seed to the acre is sufficient. To sow with a drill, mix the two pounds of seed with about half a bushel of oats, treated with strong bluestone to kill their germs, then close up some of the holes and set the drill so that all will go on the acre.

GROSS MIXTURE FOR PASTURE

I wish to seed down some land for pasture purposes, also some for hay. I should like to know what grass mixed with alfalfa would be most likely to do best as pasture for young colts, also what grass mixed with alfalfa do you fancy for hay purposes, to be grown on clay loam. Cost of seed is no object.

Sask.

T. W. D.

Ans.—As a pasture crop, alfalfa is not to be recommended, either alone or with other grasses. It is essentially a fodder crop that should be cut and fed green or cured. Tramping and close grazing is fatal to it, but it will give three or four cuttings in a season. Wherever alfalfa is grown it is best to grow it alone. It does not neighbor with grasses, and, for hay, it has to be cut before the other grasses are ready. For pasture, Mr. A. E. Wilson, of Indian Head, recommends a mixture of ten pounds of rye grass, four pounds of red

Voice Gave Out.

Thomas P. Macdonald, a prominent singer of Teeswater, says: "Six years ago I became a victim to La Grippe and had it in its worst form. The attack was unusually severe, and left me in terribly bad shape. I was utterly prostrated; weak, and run down entirely. My voice also completely gave out, and my lungs seemed to be seriously affected. People who knew me thought I was not long for this world."

"One day I saw in the paper what PSYCHINE had done for others and thought I would give it a trial, so I sent for a sample bottle. This gave me such immediate relief, and helped me so, that I determined to keep on with it at all costs, and in spite of what the doctor had said. In an incredibly short space of time I was completely restored, and my voice was soon in grand shape again. They used to tell me that a breath of wind would blow me away, I had got so thin, but PSYCHINE built me up in no time; I am a pretty solid specimen of humanity to-day, having gained in weight and put on flesh all the time."

STOP THAT COLD OR THE RESULTS WILL BE SERIOUS. You can do this by toning up the system with Psychine. All druggists and dealers sell it. 50c. and \$1.00. FREE TRIAL sent on application to DR. T. A. SLOCUM, Limited, Toronto.

ABSORBINE

will reduce inflamed, swollen joints, Bruises, Soft Blisters, Cure Boils, Fists, or any unhealthy sore quickly; pleasant to use; does not blister under bandage or remove the hair, and you can work the horse. \$2 per bottle at dealers or delivered. Horse Book 7 D free.

ABSORBINE, JR., for mankind, \$1.00 per bottle. Reduces Varicose Veins, Hemorrhoids, Hydrocele, Gout, Wens, Strains, Bruises, stops Pain and Inflammation.

Fence Frie

Every buyer of Peerless I comes a friend of ours because less fence saves him trouble and time. PEERLESS Wire Fence is made of all No. 9 well galvanized. PEERLESS requires very few posts, and money on the net cost of it.

PEERLESS

The Fence That Saves

One of the reasons why Peerless Wire Fence is better than any other fence is because of the PEERLESS lock. It holds securely and will not stretch, yet there is no elasticity to prevent snapping. It shocks, changes in temperature, any other cause. Stock can be run through it—under it or over it. So many advantages in buying PEERLESS Fence in preference to any other fence that we have no room in this ad to tell you of them.

Your name on a postal bring new printed matter, contain useful information in regard to fencing. Write for it today.
