HARTLAND

## WAS THE BEST JUDGE OF CATTLE

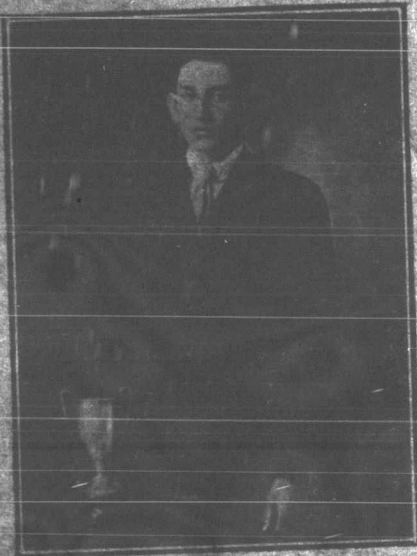

Bright Gordonville Boy, Vocational  
School Student, Wins Medal

Canada's fertile soil, rich pastures  
and interesting climate make her an  
ideal stock raising country, and she  
can boast of many good herds and  
flocks, while the increasing use of  
pure-bred sires is doing much to im-  
prove the quality of her grade live-  
stock. While our country is thus fa-  
vored, our standards are yet far below  
what it should be. A few favored sec-  
tions are producing a very desirable  
type and quality of animal, but in too  
many quarters a very inferior grade  
of livestock is to be found. Depart-  
ments of Agriculture, the breed as-  
sociations, and individual breeders

uniform animal possessed of a full  
measure of quality. In short, each  
competitor failed completely unless he  
left the exhibition furnished with an  
inspiring, an impetus to further im-  
prove himself in matters pertaining  
to livestock, and an inspiration to  
breed still better animals. We believe  
that we are justified in claiming that  
not one competitor "failed." The  
names and addresses of the first six  
young men, listed in order of pro-  
ficiency, follows:

- 1st. Ralph Lloyd, Gordonville
- 2nd. Austin Nixon, Lower Brighton
- 3rd. Howard Gibson, Jacksonville
- 4th. Irving Everett, Jacksonville
- 5th. Murray Kilfoil, Kilfoil
- 6th. Donald Bedell, Woodstock

The great war has brought vividly  
to the attention of all classes of our  
people the importance of agriculture.  
Livestock now is recognized as the

have done much to improve conditions,  
but it is to the farm boy, the future  
breeder of good livestock, that we  
must look for greater improvement.  
Realizing this, the Woodstock Provin-  
cial Exhibition Executive, this year,  
featured a Livestock Judging Competi-  
tion, open to all young men, not ex-  
ceeding 18 years of age. Fourteen  
young men entered the judging arena  
and faced four classes of stock, each  
one comprising three head, including  
a class in heavy horses, dairy cattle,  
beef cattle and sheep. The animals  
were very kindly loaned for the pur-  
pose by exhibitors. The classes picked  
out for the young men such that  
would entail sound judgment and solid  
reasoning for the placing thereof.  
Twenty minutes was the period given  
in which the boys were to place the  
class, write their reasons and submit  
the cards to E. P. Bradt, Deputy Min-  
ister of Agriculture, who supervised  
the work of the young men in the  
ring. As soon as the time allowance  
for each class was up, the exhibition  
judge, in his respective class, was  
called upon to gather the competitors  
around him and place the class, ex-  
plaining in detail his reason for so  
placing the animals. Not only did  
the boys benefit by the discourse given  
on each class, but the many specta-  
tors, gathered around the arena,  
showed by their keen interest that  
they, too, gained much.

A committee, consisting of the ex-  
hibition judges and the Deputy Min-  
ister of Agriculture, corrected and  
scored each competitor's card, giving  
him his percentage standing. The  
final summing up showed that  
Ralph Lloyd, Gordonville, 16 years of  
age, whose photograph appears, had  
amassed the greatest number of  
points, by virtue of which he won the  
silver cup donated by E. W. Math,  
Woodstock. This cup to become the  
property of the winner for two  
years in succession. It was inter-  
esting to note that the first six young  
men, listed in order of proficiency in  
the competition, were boys who, last  
winter, were in attendance at the  
Course in Agriculture and Farm Mech-  
anics at the Woodstock Vocational  
School, Woodstock. These young men  
together with their classmates, ex-  
pect to again enter this institution this  
fall to complete the two year course.  
The contest had its educational fea-  
tures. By virtue of the young man's  
previous knowledge of judging, com-  
bined with that supplied him by the  
judge, who correctly placed each class,  
the competitor learned the type and  
conformation sought after in each  
class of farm animals; he was told  
where to look for quality, and was  
shown the points which denoted it.  
Breed characteristics were impressed  
upon him in such a practical manner  
that he can carry his ideal mind and  
use it in his selection of animals for  
his own or other herds or flocks. He  
knows now that size without quality  
must always give place to the more

most important branch of Canadian  
Agriculture, and pure bred stock as  
the source from which all our best  
animals are produced. But if the  
standard of our agriculture is to be  
maintained and advanced it can only  
be done by giving the farm boy a  
chance. He and his sister are the best  
products of our farms. Give him a  
pure-bred. Give him the chance to  
attend an agricultural course at some  
institution during the winter months.

### MEAN-LAMONT

A very pretty event was celebrated  
at the manse, Glenville, on the eve-  
ning of Sept. 24, when Isabelle, eldest  
daughter of Mr. and Mrs. John R. La-  
mont, West Glenville, was united in  
marriage to W. Meen of Coldstream.  
Rev. E. C. MacLennan officiated in  
the presence of a small company of  
the bride's relatives and friends. A  
reception was held at the home of the  
bride's parents on the evening of the  
25th when a large number of friends  
assembled. After spending a pleas-  
ant evening, and partaking of a sum-  
ptuous lunch, the guests departed for  
their severed homes, wishing the new-  
ly wedded couple much happiness and  
prosperity. Many gifts were pre-  
sented to the bride, who is deservedly  
popular in the community.

Chautauque at Hartland Oct. 20-22.

## RECORD-BREAKING FLOOD DOES FEARFUL HAVOC

Damage all Along the River Follows  
Heavy Rain—Hartland Bridge  
Again Damaged

The rain that set in Thursday morn-  
ing was the heaviest the county has  
known in years. The downpour last-  
ed 36 hours without cessation, and  
on Friday morning the water in the  
river was seen to be rising fast. From  
7 on Friday evening to 6 Saturday  
morning the rise of water amounted  
to seven feet, while the total rise was  
12 feet.

There was much damage all along  
the river but the New Brunswick  
Contracting and Building Co., engaged  
in rebuilding the Hartland bridge were  
the largest individual losers. Prac-  
tically the whole of four or five weeks  
work was swept away and a large  
portion of their plant has gone with  
the tide. A huge coffer-dam contain-  
ing many thousands feet of lumber  
went adrift along with a scow and  
much other material. Two large hoist-  
ing engines, derricks and dredges are  
somewhere in the bottom of the river.  
The loss may exceed \$20,000 and will  
delay work for weeks. The public  
will feel the loss of the foot bridge.

The ferry was swept away in the  
deluge and all means of crossing the  
river except by canoe were ended.  
The ferry will be running by the end  
of the week.

Farmers felt the loss of grain and  
potatoes very seriously.

No one can recall, and there is no  
record of such a height of water in Oc-  
tober.

### THE STORK PASSES OVER

It is seldom, if ever, that the fam-  
ous "stork" is seen. Although his vis-  
its are frequent, hitherto he has been  
as unrevealed from human eyes as  
Santa Claus. The joy-bringing bird  
in his passage last week was thought  
to have been an immense airplane, and  
was witnessed by many. But not so;  
it was the "stork" and his contribu-  
tion was a nine-pound girl to Stanley  
Tomplings' home, another fine girl for  
James Layman, and a little bunch of  
feminine delight to brighten the house-  
hold of E. A. Belyea of Coldstream.

### NO INCREASE IN PRICE

Notwithstanding the enormous in-  
crease in the cost of production, over  
three times previous to war prices,  
that great weekly, the Family Herald  
and Weekly Star of Montreal, have  
decided to accept renewals and new  
subscriptions at the old rate (\$1.50 a  
year) from all who remit before De-  
cember 1st, 1922. This should be good  
news to readers of that big weekly.  
The Family Herald has been vastly  
improved and is beyond doubt the  
greatest value in newspapers.

### HAND BADLY INJURED

Last week while working in the saw-  
mill near Avondale, Earl Belyea had  
his hand so badly cut on a saw that he  
may lose the member. Dr. Belyea was  
summoned and found the right hand  
much mangled. At the best Mr. Belyea  
will have only partial use of his hand,  
while late report is that infection has  
set in and amputation may be neces-

## New Fall Goods

are now arriving at

## CARR'S

Something new in Infants and Children's Dresses, Aprons, Bibs,  
Scarfs, etc.
