

ROUND THE TOWN

Dr. M. Beaton, a recent graduate of McGill, will occupy the office of the late Dr. Pedolin at the first of July.

Wedded at Chatham

The wedding took place at Chatham on Monday evening at the residence of Col. MacKenzie, of his only daughter, Helen, and L. N. Richardson, of Halifax. The ceremony was performed by Rev. J. M. McLean, pastor of St. John's Church, and the bridal couple were given an enthusiastic send-off when they left at 11 o'clock on the Maritime express for Quebec to take steamer for England to spend three months.

More Enterprise

The Miramichi Farm Implement Co. have recently made several alterations and additions to their store, which add very considerably to its appearance. An upper floor has been added and the premises extended in the rear, and an entirely new front put in. The office capacity has been doubled, and the other additions will now enable them to display their wares to much greater advantage than has hitherto been the case.

Summer Excursion Fares

Facts and figures regarding summer vacation tours are always interesting to those who are on travel bent, and these are to be found in the booklet, "Summer Excursion Fares," just issued by the Intercolonial Railway. The details of special round-trip tours through Eastern Quebec and the Maritime Provinces are given, and routes are defined and rates quoted in a systematic and comprehensive manner. The booklet will be mailed free to all who write to the General Passenger Dept., Montreal, N. B.

Coming Wedding

Mr. Jas. P. Whelan of Newcastle, left Monday for Boston, Mass., where on the twenty-fourth of this month he will be united in marriage to Miss Eva Mullin, formerly of Bathurst, N. B. Both Miss Mullin and Mr. Whelan have a large number of friends on the Miramichi and the North Shore generally, who will extend every good wish to them in the approaching happy event. It is understood that the honeymoon will be spent in an extended tour through the Southern States.

Troul Hatcheries

Fishermen in New Brunswick have long been urging the establishment of one or more trout hatcheries and the announcement that Hon. Mr. Hazen has decided to take the initiative in this movement will give great satisfaction. There are many lakes in which few trout are now found that can with care and attention be made excellent fishing resorts, but the need of a hatchery has prevailed an effective work in the past. The policy Hon. Mr. Hazen is inaugurating is sure to prove advantageous and popular.

Moonlight Excursion

The excursion on the river under the auspices of St. Andrew's Church took place on Tuesday evening and was well patronized, the S. S. Alexandria having her full complement of passengers on board. So many people from Newcastle were anxious to make the trip, that there was little accommodation left for other passengers when the boat reached New Brunswick and only those who had purchased tickets could come aboard. At Chatham there was just enough room left for the ticket holders there, and a large number of would-be passengers were obliged to remain behind.

Presentation

Mrs. John P. Ryan, a bride of a few days, was surprised on Friday night by a visit of a delegation from the Baptist choir, consisting of Mrs. Cousins, Mrs. F. N. Atkinson and Fred Locke, accompanied by the pastor, Rev. Dr. Cousins. On behalf of the choir of which Mrs. Ryan has long been a member, Mrs. Cousins presented her with a handsome mahogany rocking chair, and expressed the choir's most cordial good wishes and hearty appreciation of Mrs. Ryan's service in the past and the hopes of a happy and prosperous future for herself and husband. The pastor aided his appreciation of Mrs. Ryan's great services to him in his ministerial duties.

Happy Hour

On Friday and Saturday another thrilling reel Brocho picture will be shown entitled "The Burning Brand." An interesting story of a half breed and a white girl. From the time the young soldier learns that he cannot marry the white girl he loves because his mother was an Indian there is a great deal of exciting action. He tears off his uniform and goes out into the desert to die. The Indians find him and recognize him. He kills the Indians and encourages them to make warfare on the whites. He demands the girl as a token of surrender, but her father says he will kill her rather than give her up. In the end the half breed is killed. A production of the intense gripping kind, a picture you will all like. Two other reels of pictures makes the programme one worth while seeing.

Grand Pilgrimage to Montreal and St. Ann on June 24th. Train leaving Newcastle at 7:45 a.m. Tickets on sale at J. D. Pagan's store, 25-1-pd.

Can Solemnize Marriages

Rev. Thomas S. Roy, temporary pastor of the Brunswick street Baptist church, Fredericton, has been authorized to solemnize marriages in this province.

Liberal Meeting

A meeting of the Northumberland Liberal Association is to be held this afternoon in the Temperance Hall, but as one prominent member of the party said this morning, "there probably won't be many there. Liberals are so blamed hard to find nowadays."

Taking Time by the Forelock

Messrs. H. W. Hinton & Co. have decided not to wait for the installation of the town clock, but have had affixed to the outside of their premises, a gong which is connected electrically with the clock inside and which strikes the hours and half hours. Residents in and round the Square will find this exceedingly useful, particularly at night.

Church Parade

Members of Northumberland Lodge No. 17 A. F. and A. M. will meet at the Lodge room on Sunday evening next at 6:15 for the annual church parade, which will take place that evening to the Methodist Church, where Divine services will be conducted by Bro. Rev. R. G. Fulton of Chatham. Visiting brethren will be welcomed.

Brakeman Injured

Clarence G. Scurr, an employee of the I. C. R. was a victim of an unfortunate accident in the railway yards here on Monday. He was rear brakeman on the way freight and was standing on the top of a box car when he lost his balance and fell to the ground receiving severe bruises and it is thought internal injuries. He was taken to his home in Moncton where his injuries were attended to.

The Tomb of Flame

On Monday evening there will be shown at the Happy Hour one of the most exciting and interesting detective photo plays ever acted entitled "The Tomb of Flame" or the Escape of the White Glove Gang in four reels. This picture has only been shown twice before in this province that being at Moncton and Fredericton and the papers speak very highly of the plot and the acting as one of the best ever shown in these two cities.

Big Mackerel Catch

A message from Richibucto yesterday says that Mackerel boats are coming in with from one to two thousand fish each. There are between forty and fifty boats in the fleet. There are more mackerel in the frezers now than there were all last summer. The owners of the cold storage plants are hard set to handle the fish. Messrs. A. & R. Loggie think they will have to ship some of them in ice to their freezer in Dalhousie.

A Fine Catch

While fishing at Slaters' Rapids last evening, Mr. Richard Baker of Littleton was successful in landing a trout which exceeded the scales at seven pounds. When fishing at the same place a few evenings before, Mr. Baker caught several specimens that scaled four and five pounds. This is not a "fish story" of the ordinary sort, for the big fellow was seen and weighed in the presence of several reputable witnesses.

Fredericton Exhibition

The prize list for the forthcoming Provincial Exhibition at Fredericton which will open on 15th September, has now been issued, and as usual, is the most comprehensive affair of the kind published in the province. Prices aggregating \$15,000 are offered for competition in 102 different classes, which include every branch of industry which comes under the farmers' ken, besides the usual classes for domestic work, fine arts and other home industries. All information may be obtained from W. S. Hooper, the Secretary at Fredericton.

Edward Riedel, of St. Louis, has tried to yawn five times in the last four years and in each case has dislocated his jaw.

For years it has been believed that petroleum existed in Sicily, but only recently was experimental drilling begun, resulting in the discovery of oil of good quality.

A millinery firm in London (G. B.) which has 60 display windows in its store, recently had all the windows filled with women's hats. Nearly 5,000 hats were shown.

Oil your castors once in a while and see how much more easily large pieces of furniture may be moved. Do this at any rate at housecleaning time, and take care to wipe off any superfluous oil, not only because it would collect dirt but also because it might drip a little and stain the carpets or rug.

PERSONAL

Mrs. T. Foley spent Tuesday in Chatham.

Mr. Harry Rich is sick at the Hotel Dieu, Chatham.

Miss Gladys Bule of Douglastown is visiting her aunts the Misses Bule.

Miss Annie Alexander of Douglastown visited Miss Florence Adams this week.

Misses Helen Nowlan and Bertha McGrath of Chatham spent Sunday with Mrs. W. J. Dunn.

Misses Blanch Taylor, Lillian Williams and Nellie Lingley visited friends in Chatham last week.

Mr. C. P. McCabe is in St. John this week attending the annual convention of the Knights of Columbus.

Mr. and Mrs. Chester C. Hayward and family and Miss S. Williams are enjoying an auto trip down the Miramichi and Gloucester coast. They intend to return to-morrow.

Mr. Reginald Shea of Boston and Mr. Earl Wilson of Ontario were called here last week by the illness of their mother, Mrs. James Wilson, Derby Jct.

Mr. Edward Morris returned on Sunday from St. John where he passed the required examinations and is now a registered druggist in New Brunswick. Mr. Morris has also passed the Ontario examinations.

Rev. Dr. Cousins left yesterday for a visit to Tracadie Lazareto. He will return to-morrow, and leaves on June 30th for Winnipeg on a month's vacation. On the first two Sundays in July he will occupy the pulpit of Nassau Street Baptist Church in that city.

Rev. C. P. Wilson, Supt. of Baptist Home Missions, passed through Newcastle on Tuesday returning from a visit to Whitneyville and Lyttleton Churches, where on Sunday he presided at business meetings. Rev. W. E. Piper, B. A., who has preached on this field for the year just past, received a hearty call to remain another year, and will probably accept. Supt. Wilson reports the work in these congregations in a very satisfactory condition.

CRUSHED TO DEATH WHEN SHED FELL

Harold Lindsay, 21 years old, was crushed to death at Moncton on Monday night, when a wooden shed three hundred and fifty feet long and twenty feet high was blown from its foundations during a fierce wind and hail storm.

The storm lasted for half an hour and was one of the most severe in recent years, but the damage done to poles and wires was comparatively small. Along the lake and river shore the threatening signal drove all craft to shelter, and no loss of life is reported. The ferry boat plying between the Indian town of Cauchokawaga and Lachine was caught in the middle of the river and had to anchor until the storm abated.

BRITISH BRIEFS FOR BUSY READERS

Poorly paid Occupation
A warning was given at a meeting of the Lancashire Education Committee that there is but a poor prospect for boys who take up teaching as a profession. The maximum salary for assistant masters in Lancashire, it was said, was \$700 a year, and teachers with families could not make ends meet on it.

Abbé Who Was Imprisoned as Spy
The Abbé Dominic Hubert known in the Roman Catholic Church as the author of several books of devotion, died suddenly at Bath in his eightieth year. He was a native of Alsace, and during the Franco-Prussian war was imprisoned by the Germans at Strasbourg on suspicion of being a spy.

Flax Growing in Yorkshire
Selby, formerly an important centre of flax growing, was chosen by the Development Commissioners as the site of further experiments in the industry. The University of Leeds made the preliminary arrangements, and a grant for the development was sanctioned.

Brewery's Radium Gift to Hospital
To celebrate the twenty-fifth year of the existence of the company, the shareholders of a Manchester brewing company voted \$1,250 for the purchase of ten milligrams (about one 2,900th part of an ounce) of radium for the Manchester Royal Infirmary. It was said that even allowing for 99 per cent. of error the radium would be working in the year 2163.

Brother's Dramatic Plea
After a long list of convictions for larceny, uttering counterfeit coin, and manslaughter was proved against a Durham miner, Edward Palmer, charged at the Guildhall with attempting to commit suicide, a man in court shouted: "I am his brother. You have heard all that is said about him, now hear the good." In the witness-box the man stated that his brother had tried to redeem the past. Unfortunately he had taken a drink too much. Palmer was bound over for six months.

OBITUARY

Peter S. Atchison
Mr. John A. Pollansboe has received word of the death in Philadelphia of her uncle, Peter Saunders Atchison, at the age of 99 years. Deceased was a native of N. B. and moved while still a young man to the States. He is survived by a married daughter, Ada Amanda, living in Philadelphia. Deceased was a brother of the late Mrs. James McNutt of Newcastle who died, also at a great age, three years ago.

James Taylor, Sr.
The funeral of late James Taylor, Nordin, took place to St. Paul's Cemetery, Chatham Head, Saturday afternoon. Deceased died of old age being 94 years old. Death took place Thursday at the home his son, James, Jr. The late Mr. Taylor was a good industrious citizen whose departure is much regretted. He leaves the following children:—James and Thomas of Nordin, John of Douglastown, Mrs. John Jardine, Newcastle and Mrs. John Houston in the U. S.

Mrs. Margaret Amos
The death of Margaret, nee MacNeil, relict of late Robert Amos and daughter of late Alexander MacNeil of P. E. Island, occurred at Nelson Reserve Sunday afternoon at the age of ninety-four. Deceased was of Scotch descent, and coming here at an early age, was one of the most highly respected residents of the County. She was the oldest member of the Lower Derby Baptist Church, and had lived a most exemplary life, winning the love of all who knew her. She is survived by two daughters—Mrs. Alfred Davidson of Fredericton and Mrs. John MacKay of South Nelson, and nine grandchildren and six great grandchildren.

The funeral took place on Tuesday afternoon, Rev. Dr. Cousins conducting services at the house and also at the grave. Interment was at the Lower Derby Baptist cemetery. The funeral was very largely attended both by residents of Nelson and of Derby Parish. The pallbearers were: William, Amos, Silas and Edward Russell, Robert Hubbard and George Amos.

The funeral procession was conveyed across the river from Nelson Reserve to Lower Derby in scows and boats drawn by John Betts' motor boat under the care of James Lyon of Millerton.

On Sunday afternoon, June 29th, Rev. Dr. Cousins will conduct a memorial service for the late Mrs. Amos in Lower Derby Baptist Church.

BASEBALL NOTES.

The Newcastle Victors who have been the idol of the fans for the past few years, made their initial appearance this year on Thursday evening when they played a team representing the Sons of Temperance and did with a score of 9 to 1. Percy Linton was in the box for the S. of T. and showed up well, while Harry Graham for the Victors was as good as ever, and Murphy played a star game behind the bat. The other members of the teams played well and it is hoped that the Victors will be seen often in action before the season closes.

On Friday evening in the local league fixture the Merchants lowered the Bankers' colors for the first time this season. The game was one of the best played here this year, and was keenly enjoyed by the large crowd present. McMurray in the box for the winners did excellent work, while Crocker for the losers was off color. The feature of the game was Morrissy's home run in the fourth. Percy Linton unpired with satisfaction to all.

On Saturday night the picked team of the Bankers and S. of T. journeyed to Millerton and there met and defeated the team of that town to the tune of 7 to 6. Crocker and Simpson were the opposing pitchers.

Monday's game between the C. T. A. and S. of T. was won by the former with a score of 14-12. The teams were evenly matched, but with a strong wind blowing, good playing was almost impossible. Chambers for the winners pitched good ball, as did A'Hara for the losers, until the fourth inning when he was relieved by McMurray. The umpire was Percy Linton.

The Wednesday evening game between the C. T. A. and Bankers was one of the poorest games yet played in the local league. The Bankers hit both Young and Chambers hard and the fielders did not care whether they fielded the ball or not. Such exhibitions as put up by some members of the C. T. A. only tend to destroy all interest in the game. The other members of the team who played their best, deserve credit for keeping the score so low as 20-1 as it was in reality a five man team against a nine.

The Victors still have their challenge out for the Bankers and it is hoped that these teams will soon meet as such a game would be a good drawing card.

Charge for the advice you hand out if you want people to take it.

CUTS TO A UNIFORM DEPTH

Here's a harrow that works evenly in rough, stony, gullied or stumpy ground. It doesn't spring out of shape, dig down on one end and bump out on the other. The Windsor Disc Harrow is just ride-tough to withstand hard knocks, and cut to a uniform depth the full length of the gang. The Windsor Disc Harrow is built in a strong, braced steel frame, braced solidly in every direction to withstand wearings and twistings, hard jars and bumps. The two gangs of discs are independently controlled by separate levers. These levers are quick-setting, and the driver, by the patented pole-attachment for 4 horses can be hitched to any of the four corners of the harrow, so bolts or nuts to fasten the levers are able to be set in either direction to suit the ground conditions. The harrow is made by the foot. The Windsor is built in a strong, braced steel frame, braced solidly in every direction to withstand wearings and twistings, hard jars and bumps. The two gangs of discs are independently controlled by separate levers. These levers are quick-setting, and the driver, by the patented pole-attachment for 4 horses can be hitched to any of the four corners of the harrow, so bolts or nuts to fasten the levers are able to be set in either direction to suit the ground conditions. The harrow is made by the foot. The Windsor is built in a strong, braced steel frame, braced solidly in every direction to withstand wearings and twistings, hard jars and bumps. The two gangs of discs are independently controlled by separate levers. These levers are quick-setting, and the driver, by the patented pole-attachment for 4 horses can be hitched to any of the four corners of the harrow, so bolts or nuts to fasten the levers are able to be set in either direction to suit the ground conditions. The harrow is made by the foot. The Windsor is built in a strong, braced steel frame, braced solidly in every direction to withstand wearings and twistings, hard jars and bumps. The two gangs of discs are independently controlled by separate levers. These levers are quick-setting, and the driver, by the patented pole-attachment for 4 horses can be hitched to any of the four corners of the harrow, so bolts or nuts to fasten the levers are able to be set in either direction to suit the ground conditions. The harrow is made by the foot. The Windsor is built in a strong, braced steel frame, braced solidly in every direction to withstand wearings and twistings, hard jars and bumps. The two gangs of discs are independently controlled by separate levers.
