This is just about your last chance to buy stock in Marcell Mines, Limited, at 35c per share. Every sign points to this being a big paying investment: work now being done daily confirms this.

The Marcell claim-owned under certificate of record by the company-is 40 acres in the rich Montreal River country, one mile from Elk Lake, over which the ore will be shipped to Latchford on the T. and N. O., until that road comes close to Marcell next

Fifteen veins have already been exposed; and ANY ONE of the fifteen alone warrants the whole proposition, which is capitalized at only \$500,000. A single shaft, and not a deep one either, will open up four known veins.

Buy Marcell Now at 35c

Fifteen feet from one boundary of the Marcell runs the main vein of the Lucky Godfrey, which bagged rich ore from only eight feet depth. The Devlin & Enright adjoins the Marcell on the east, and is now bagging ore running from 3,000 to 5,000 ounces to the ton. The Marcell surace indications are identical with those mines; and the Lucky Godfrey vein is known to cross the Marcell tract. That looks like a real mine, doesn't it?

> Let me send you, today, fullest information about this opportunity--for it IS an opportunity. Investigate everything about the Marcell-it happens to be a proposition that will stand it. But you will need to move quickly--the issue of 150,000 shares thirty-five cents is rapidly being taken up.

London, Monday, Nov. 30. A small number of loads of hay was on the stand at the market today, and sales were slow, as it usually is in rainy weather. Prices, however, were not much lower, frob \$10 to \$12 per being paid. No straw, wheat or oats \$11 50 per ton.

The jump in the price of dressed hogs at Saturday's market was the principal reason for the small number of live hogs that was offered today, as the farmers contend that at the prices of dressed it pays better to slaughter them than to sell them on foot. Counsel Argue Matter Before Premier Whitney Who Is Acting for Mr. Fov.

Toronto, Nov. 28.—The Star says: that Walter D. Beardmore will next Tuesday secure a fiat from Acting Attorney-General Whitney, permitting the addition of the Ontario hydroelectric commission as a defendant in his suit against the city to nullify its agreement with the commission for power. Premier Whitney has declared that he is to some degree affected by a casual remark of the court that the case seemed to be one of wide public interest and that it might be well to have the commission included

in the defense. Mr. E. F. B. Johnston, K. C., who with Mr. Frank O'Brien, K. C., appeared for the plaintiff, assured the Premier that the suit is primarily against the city, and that the commission is only wanted as a defendant in order to forestall a plea on the part of Toronto that the trial would be unfair to the city without the commission as an added defendant.

Got It Adjourned. Corporation Counsel Fullerton finally secured an adjournment of the application until Tuesday at 11 a.m., as the hydro-electric people had not been notified of the hearing yesterday, and as it is also desired to hear Smith vs. London at the same time, the questions involved in the two applications being exactly the same.

CUROL is the Reliable Remedy for this Most Tormenting and Irritating Skin Disease. In CUROL we have the embodiment of the best healing properties known to the medical world.

CUROL goes to the root of the difficulty with a determination which is simply marvellous. It first all eradicates every particle of disease and foreign matter. Having accomplished this, the healing is

often only a matter of days.

The healing done by CUROL is well done, for it positively will not heal until the wound is clean and free from impurities. Not so with salves containing Zinc, Mercury, Lead, etc. These poisonous salves may heal quickly, but do a great deal of damage by driving the impurities into the body, causing very serious consequences. You should shun such, and use only a salve free from these harmful minerals. Such a salve is CUROL.

There is a total absence in CUROL of rancid, fatty substances, so often found in cheap ointments, and does not cake, clog or become hard. It is immediately absorbed by the skin, and thus penetrates to the seat of the disease. This fact alone makes CUROL popular. It is pure, and we have no hesitation in saving the best 25 cent salve on the market. We
