passage as stated above on the Spartan. Among the passengers were several Torontonians, namely: R. W. Ellidt, John Leslie (auditor C. P. R.,) Mr. Cameron (Sheddan Co.,) and Joe Manley (school of practical science.) A happy idea struck this quartet. There was a parson on board, Rev. Alex. Mackenzie of Lucknow. Why not let the steamer be the scene of the ceremony? As Mr. Elliot re-marked, "ours is the only line that carries a chaplain." The idea was sug-gested to Capt. PRE. INDIAN OCCUPATION. Hound Builders on the South Shore o Inke Ontario Ages Ago. From the Rechester Post-Represe. The Post-Express has been favored with advance sheets, up to page 208, of Mason's forthcoming "History of Rochester," edited by William F. painstaking care with which every feature has been perfected, make it one of the most orderly and satisfactory local histories ever penned. The story of the settlement of Rochester is a peculiarly fascinating one, and it must be confessed the further back

ridge, which extends from Sodus around Lake Ontario into Canada, at a distance of from three to eight miles from the present lake beach. Some of the sticks of wood in the fireplace were smooth, and one piece was dented, as if a dull instrument had been employed to break it. This find, Mr. Harris claims, proves that man was a habitant of the south shore of Lake Ontario before the ridge existed and at a time so remote that it is not possible to fix its limit. The ridge in tarm is shown to antedate the rock out channel of the Genesee river. The elevation of the interior of the conti-ment was followed by the subsidence of the sea waters into the depressions of the earth then existing. Then the Genesee valley lake burst through the hills east of the pinnacle, and a mighty stream, now the Genesee, gushed forth, excavating the Bay of Irondequoit. In time this channel became extinct, and the waters cut a new outlet west of the present channel, near the rapids in South Rochester, pursiling a direct northern course to the present Genesee fulls. This passage becoming obstructed just north of the rapids, the river was directed east toward Mount Hope, and thence northward through its modern channel. The production of the Genesee river gorge through the subscience of the genese river gorge through the subscient for Lake Ontario is mainly the result of ero-sion, having been effected by Irmning water aided by frost, and it is evident that this work has heen accompliabed since Tools valued at \$300 were stolen from four months. A curious co-incidence occurred at the Roman estholic cathedral, Quebec, Sunday, when two widows, who had died during the week, were prayed for, and both were 83 years old. A 4 year old daughter of John Bathshill, ate of Merses, but now of Detroit, had her the other day. Geo. Hurst of Sandwich East, in boring for water, struck a vain of gas, which, on being ignited, blazed for three days, de-stroying a lot of machinery. The spirit of progress has struck the mennonites in southern Manitoba. They send their ohildren to the public schools, and have organized farmers' clubs. They have an armless half breed boy up at Winninge who can row, fish, use a bow and arrow, and go through a number of other performances with his feet. His father intends exhibiting him. A steer committed suicide near Lucknow by hanging himself to a willow bush by leg cut off by the cars at the latter place

To three Milwaukee lawyers who put in bills amounting to \$25,000 for services in settling an estate worth \$32,000, Judge Thomas Drummond said : "Gentlemen, you consider yourselves good lawyers How much more are your services worth to your clients than mine to the people You have charged \$25,000 for sixty days service. Could you not be content, each of you, to take my pro rata for the same time? These charges are infamous. They are such as scoundrels and thieves would make. This charge of \$15,000 is cut down to \$1500, those of \$5000 each to \$500. Re-peat such a piece of rapine in this court and I will dis-bar every one of you."

Illustrations of these relics (which were presented to Prof. S. A. Latti-more by H. S. Brewer) appear in the his-tory. In 1882 a human skeleton of large proportions was dug up near the former location of the eastern mound. Other re-mains were discovered on the farm of Samuel Truesdale, in the town of Greece, one being a skeleton over eight feet in length. It was found under a small mound. In 1879, on the farm of George H, Lee, half a mile west of Mr. Trues-dale's, a beautiful clingstone ax was plowed up in a field near an ancient burying ground, in which, in 1820 or 1822, twenty skeletons had been recovered by laborers digging in the Eric canal.
