TORONTO, ONT., AUGUST 23, 1899

No. 31.

CANADA LUMBERMAN

PUBLISHED BY

The G. H. Mortimer Publishing Co'v
of Toronto, Limited

Confederation Life Building - TORONTO.

Branch Office:
NEW YORK LIFE INSURANCE BUILDING,
MONTREAL.

Weekly Lumberman, published every Wednesday. Contains reliable and up-to-date market conditions and tendencies in the principal manufacturing districts and leading domestic and foreign wholesale markets. A weekly medium of information and communication between Canadian timber and lumber manufacturers and exporters and the purchasers of timber products at home and abroad.

Lumberman, Monthly. A 20-page journal discussing fully and impartially subjects pertinent to the lumber and wood working industries. Contains interviews with prominent members of the trade, and character sketches and portraits of leading lumbermen. Its special articles on technical and mechanical subjects are especially valuable to saw mill and planing mill men and manufacturers of lumber products.

Subscription price for the two editions for one year, \$1.00.

The Ship's Mfg. Company, of Toronto, has been incorporated, with a capital of \$20,000, to manufacture a patented machine for the manufacture of skewers

WESTERN CANADA AND EXPORT EDITION.

The publishers of the CANADA LUMBERMAN are completing arrangements for the publication, about the 1st of October next, of a special number, to be known as the Western Canada and Export Edition, and to be devoted particularly to the lumber interests of Manitoba, the Northwest Territories and British Columbia, and to the export lumber trade of this part of Canada. It is the purpose to place a copy of this number in the hands of every saw mill owner, retail dealer and wood-worker in Western Canada, and also to distribute a large number of copies amongst the timber importers and others interested in Great Britain, South America, China, Japan, South Africa and Australia, to which countries British Columbia timber products are exported. By this means it is sought to better acquaint foreign consumers with the timber resources of our western provinces, and with the possibilities of obtaining supplies in Canada. There are many manufacturers in the Dominion who are interested in supplying the lumber requirement of the countries named. To these the opportunity is given of being represented in this number. Information regarding prices for advertisements will be gladly furnished upon application.

CURRENT TRADE CONDITIONS. ONTARIO.

A number of buyers from the Eastern States have visited Ontario manufacturing points during the past week. Some of them were prepared to purchase either pine or hardwoods, but they have been unsuccessful in securing any quantity of stock. In some instances, however, orders have been placed for lumber to be manufactured this fall. The general report from the mills is that the demand is greater than the supply, and that lumber is being shipped green from the saw. There is a particularly brisk demand for dressed lumber and mill culls.

Preparations are being made in the Ottawa valley district for the winter's operations in the woods. It is probable that the production of logs will be greater than last winter, although the quantity may be restricted by the scarcity of labor and consequent high wages.

A branch of the lumber business that is particularly prosperous is the cooperage trade. Few mills have any slack barrel stock on hand in shipping condition, while stocks in the process of seasoning are very small, and are held at a high figure. This refers to staves, hoops and heading, but more especially to hoops. The average prices are, we believe, slightly higher than those quoted on the fourth page.

MANITOBA AND BRITISH COLUMBIA.

Retail dealers in Manitoba and the Northwest are stocking up for fall trade, and consequently there is a large movement of lumber from wholesale yards. Prices generally are being adhered to. The mills in British Columbia are enjoying a brisk trade, export, local and eastern business being in good shape. The local consumption this season has been greater than ever before, while there has also been a slight improvement in prices. The new mill of the British Columbia Mills, Timber & Trading Co., at Hastings, is about to commence operations. This will increase the output considerably.

UNITED STATES.

The United States lumber market is quite as firm as when last report was written. At some points trade is quiet only on account of the limited quantity of stock for sale. Prices at western producing points have been firmly maintained, while in the east dealers have felt compelled to make further advances in order to equalize the additional cost of the stock in the west and the advancing lake freights. On August 14th Tonawanda dealers issued a new price list, advancing all kinds of stock by from one to two dollars per thousand. This market reports a brisk export trade and a strong demand for 14-inch boards, orders for which are being turned down on account of the scarcity of stock and high prices asked. Buffalo is short of low grade cutting-up pine. At Boston pine has advanced about one dollar per thousand in the last two weeks, and there is a slight increase in the demand from many sources.

The hardwood market remains unchanged, excepting that as the season advances the opinion is gaining ground that prices of several kinds of hardwood will go still higher. There is a shortage of basswood in the Buffalo and Tonawanda markets, and prices are advancing almost daily. Thick white ash is exceedingly scarce at Boston, three and four-inch bringing \$60 to \$65; 1¼, 1½ and 2-inch is quoted at \$49 to \$51, and 1-inch at \$42 to \$44. Elm is in good demand at \$30 to \$33, and maple is steady at \$27 to \$30 for 1-inch, \$29 to \$31 for 1¼ and 1½-inch, and \$32 for 2-inch.

FOREIGN.

The conditions in the British market have been improved by exceptionally favorable weather for building work. There continues to be an active consump-

LUMBERMAN'S VEST-POCKET INSPECTION BOOK

Containing Rules for the Inspection and Measuring of Pine and Hardwood Lumber in the leading markets of Canada and the United States. Embracing also many useful tables and calculations of everyday service to lumbermen.
