

**A SUPERIOR IRON PILL.**

WM. R. WARNER &amp; CO'S

**...Pil. Chalybeate...**

Easily assimilable  
form of  
Ferrous Carbonate.  
Useful in

**Anemia**  
**Chlorosis**  
**Phthisis**

We claim there is no superior method of prescribing iron than by Pil. Chalybeate and Pil. Chalybeate Comp. We have combined Ferri Sulph.  $1\frac{1}{2}$  grs. and Potass. Carb.  $1\frac{1}{2}$  grs. so that upon disintegration of the pill in the visceral fluids, the contents are released as protocarbonate of iron, one of the most assimilable forms of this remedy. They are pills requiring skilful manipulation during their manufacture on account of possible oxidation. An iron pill that oxidizes while being prepared is of very little value. To distinguish the value of an iron pill, dissolve it in water. A light green color indicates protocarbonate, while a reddish brown denotes the ferric salt, decomposed by oxidation.

FORMULA.  
R--Aloin.  $\frac{1}{4}$  gr.  
Ext. Bellad.  $\frac{1}{8}$  gr.  
Strychnine, 1-60 gr.  
Ipecac, 1-16 gr.  
Dose—1-2.

**PIL: PERISTALTIC**

(W. R. WARNER &amp; CO.)

FOR

**CONSTIPATION,**  
**BILIOUS DISORDERS.**

SMALL,

EFFICACIOUS,  
EFFECTIVE.

NO GRIPING,

NON-IRRITATING TO  
HEMORRHOIDS.

**PIL: PERISTALTIC (MERCURIAL).**

Same formula as Pil: Peristaltic with 1-10 grain Calomel added.

**SUPERIOR TO PEPSIN OF THE HOG.****INGLUVIN**

A Powder—prescribed in  
the same manner, doses  
and combinations as  
Pepsin.

**A SPECIFIC FOR VOMITING IN PREGNANCY.**
