Grant Brown is busy delivering his celebrated lecture to sympathizing friends on "How It Happened," or "Up Against It."

A. G. Brown, '03, succumbed to a knock-out blow while boxing in the gymnasium last week. Five-ounce gloves are not for amateurs.

We regret to learn of the recent bereavement of another member of the faculty in the person of Dr. Toews. who lost his mother shortly before the close of last term.

The class of '04 has been considerably increased during the past week. Among the recent arrivals are: Misses Ward, Moore and Ferguson, and Messrs Bow and Scott.

There is a slight difference of opinion between one of the faculty and a prominent freshman. The former remarked the other day that the freshman must be only a beginner, but "Pete" thought he saw his finish.

Miss Barrows is still in Jackson Sanitarium, Dansville, where she went immediately after leaving Toronto. Her admirable pluck and unfailing brightness deceived many of her friends as to the seriousness of her illness here. We are glad to announce, however, that she is now almost restored to sound health.

Lieutenant H. Z. C. Cockburn, '91, of the Royal Canadian Dragoons, has been recommended for the Victoria Cross by General Smith-Dorrien, on account of his conspicuous gallantry in leading his troop to the rescue of a Canadian gun at Belfast, November 8th. Lieutenant Cockburn is now on his way to London.

THE ROYAL MILITARY COLLEGE.

There are few national institutions of more value and interest to the country than the Royal Military College at Kingston. At the same time its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government institution, designed primarily for the purpose of giving the highest technical instructions in all branches of military science to cadets and officers of Canadian Militia. In fact it is intended to take the place in Canada of the English Woolwich and Sandhurst and the American West Point.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and in addition there is a complete staff of professors for the civil subjects which form such a large proportion of the College course.

Whilst the College is organized on a strictly military basis the cadets receive in addition to their military studies a thoroughly practical, scientific and sound training in all subjects that are essential to a high and general modern education.

The course in mathematics is very complete and a thorough grounding is given in the subjects of Civil Engineering, Civil and Hydrographic Surveying, Physics, Chemistry, French and English.

The object of the College course is thus to give the cadets a training which shall thoroughly equip them for either a military or civil career.

The strict discipline maintained at the College is one of the most valuable features of the system. As a result of it young men acquire habits of obedience and self-control and consequently of self-reliance and command, as well as experience in controlling and handling their fellows.

In addition the constant practice of gymnastics, drills and outdoor exercises of all kinds, ensures good health and fine physical condition.

An experienced medical officer is in attendance at the College daily.

Five commissions in the Imperial regular army are annually awarded as prizes to the cadets.

The length of course is three years, in three terms of 91/2 months' residence each. The total cost of the three years' course, including board, uniforms, instructional material, and all extras, is from \$750 to \$800.

The annual competitive examination for admission to the College will take place at the headquarters of the several military districts in which candidates reside, in May of each year.

For full particulars of this examination or for any other information, application should be made as soon as possible, to the Adjutant General of Militia, Ottawa, Ont.

UNIVERSITY OF TORONTO DINING HALL
