Special Summer Courses for Teachers

AT THE
PROVINCIAL INSTITUTIONS, TRURO, N. S.,
Continuing during Five Weeks, beginning July 15th, 1903.

I. **At the School of Agriculture.**— Courses in agriculture and the allied sciences, for teachers desiring to perfect themselves in nature-teaching or to pursue science-study. Biological and chemical laboratories at disposal of students. Laboratory method of instruction; field-work, class excursions, and individual investigation. School garden and greenhouse in connection with laboratories. Extra vacation granted to teachers in attendance (see School Law Manual). Manual-training classes open to students in this section. Apply to Prof. H. W. SMITH, Principal, School of Agriculture.

II. **At the Provincial Normal School.**— SPECIAL SUMMER COURSE FOR BILINGUAL TEACHERS IN ACADIAN SCHOOLS.— Modern conversational methods of teaching English in the lower and higher grades of schools in French-speaking communities. Model classes composed of French children. Free discussion of difficulties arising in the conduct of such schools. Travelling expenses at rate of five cents per mile each way allowed to attending teachers who speak French and English with fair fluency and who are employed in schools of French communities. Courses in manual training open to students in attendance. Further information from the Principal of the Provincial Normal School, or from M. J. ALPHONSE BENOIT, Director of Bilingual School.

III. **At Manual Training Department of Provincial Normal School.**— Courses in manual training for primary and intermediate grades, as well as for the higher grades of rural and town schools, and especially for teachers aspiring to qualify their schools for ranking as "Superior." [See Manual of School Law, §53 (d.)]

Time spent to good purpose in this summer work will be deducted from the regular period of attendance for candidates desirous of entering subsequently on the course of training for license in mechanic science.

Special short courses in cardboard work and woodwork for bilingual teachers and for students of the School of Agriculture.

Further information from the Principal of the Normal School, or from T. B. KIDNER, Manual Training Inspector.
